# Chapter 1: Precognition

Happy Halloween! In the spirit of Halloween here's a little something different. This is also one of the novels that I'm considering for translation. Remember to stay safe trick-or-treating and don't rob too many kids. If you find a hole in your candy or if it's already been opened... Just make sure you eat it at home and hope it only gets you high. For those of you who don't have Halloween... eat some instant noodles?...

---

**Title:** The Gate of Extinction, 灭世之门, mie shi zhi men

**Author:** Dark Lichee, 黑暗荔枝

**Genre:** Doomsday, 末世危机

**Tags:** Just think of other doomsday/apocalypse novels/manga/anime

**Synopsis:** Resident Evil, natural disasters...

Zombies, ice age...

In movie theaters, in video games, everyday human's are encountering this kind of "doomsday".

But nobody actually believes these...

From little Su Lifeng was a person that can foresee disaster, but he never thought that one day he would foresee the end of the world:

100 days later, the entire world fell.

Humans are about to become extinct.

Su Lifeng to a big, deep breath, waking up from the vision: "I need to bust a load

to calm down...”

[RAW](#)

## Chapter 1: Precognition

“Above New York a shocking sight of black clouds covering the sky appeared for numerous days, netizens call it a doomsday scenario...”

“In the London region thunder and lightning flashed for consecutive days, in one night nearly 20 thousand flashes of lightning illuminated the night sky as if it were the daytime...”

“Beijing consecutively suffered large dust storms for one month, travelling is difficult for citizens and the highways along with airports have been forced to close numerous times...”

“In recent times extreme weather has appeared all over the world, experts express that this could be related to global warming but this theory has suffered rebuttals from multiple fronts. American scientist Jason Walner has published an article in ‘The New York Times’ commenting that the appearance of the extreme weather could be forecasting a massive change in the Earth’s environment, yet this argument has also suffered disapproval from multiple experts after publication...”

“Tonight we will connect with a famous meteorologist of our country to communicate and discuss with everybody, through the internet you can...”

.....

Pa, closing the laptop Su Lifeng lifted up his head and pinched his slightly throbbing eyebrows.

“Yesterday, today morning...” He muttered saying.

Of the three news reports, two of them he already “saw” yesterday, the other one he “saw” this morning.

The time interval between “seeing” and actually happening has shortened even more.

And his so-called “seeing”, if you speak of it using some explanations found online, it should be called — “Precognition”.

Since he was around 7 to 8, Su Lifeng started to occasionally see some strange visions. The majority are just a couple of very scattered fragments and the visions are usually very astounding, making people feel shocked. But due to the appearance of the visions being very short, Su Lifeng did not even tell his parents and concealed this tiny abnormality.

A child seeing hallucinations is not any sort of good thing. Su Lifeng at that time already understood this point.

But only until one time when in his hallucination he saw a vision of large amounts of mud and boulders tumbling down in front of him, and then a few days later saw the same scene from the television news report did Su Lifeng suddenly become aware that what he is seeing is not just a simply hallucination...

“In the neighboring city a mudslide has occurred at a scenic location due to torrential rain, luckily at the time of occurrence there were few visitors so it did not create any casualties, our station new reporter at the scene...”

In the process of repeatedly comparing and confirming, Su Lifeng’s mind and thoughts all received a strong impact.

Precognition... His parents are both ordinary workers, how come he, a completely ordinary little kid possesses this kind of ability?

In the following time, Su Lifeng started a long period of consulting materials and all kinds of comparisons, on one side attempting to discover his own problem through reading a great number of books, on the other side searching for the regular pattern between the precog and reality.

At the earliest he did this through reading the newspaper and sticking in front of the television watching the news. Only until after the appearance of the internet did this “job” of Su Lifeng’s become more convenient and easier.

And after comparisons of up to hundreds of times, Su Lifeng discovered that there exists a varied time difference between the “reality” that he foresees and the actual time of occurrence. The longest ones are a month, the latest are a couple of days.

But after these three news reports his new record has now become...

“Six hours.” Su Lifeng exhaled lightly.

“What were you looking at just now?” A familiar voice suddenly came from behind. Su Lifeng was instantly startled, hurriedly lifting his head.

At some unknown time a long-haired girl had appeared at the opposite side of the coffee table, smilingly looking at him.

Jiang Yushi, like him they are both postgraduates of the Institute of Biological Sciences of Ningnan University. At the same time she is also a girl with an extremely soft voice, her appearance is delicate and sweet and her disposition carries the unique grace of Jiangnan girls. But anyone slightly familiar with her knows that this girl possesses a whimsical character that does not match her outer appearance.

Such as right now, she is using a sort of sly gaze looking at him. Su Lifeng once casually mentioned once that there might be a place where a volcano will erupt... At that time he once looked up every single already known volcano without pause. But before he could find out which volcano the news had already reported it. And this phrase that he said was squeezed out of him by Jiang Yushi while he was in the process of fully concentrating on research.

Yet it is just this casual little matter that made Jiang Yushi firmly keep it in mind. After that everytime she sees Su Lifeng staring at the computer she will always display great interest. Although, she does not inquire closely about it, she only beats around the bush so Su Lifeng only just feels helpless about it and does not feel offended.

On the contrary, gradually the two went from being regular classmates to slowly becoming friends.

Towards this Su Lifeng is also accustomed to it: “Movie.”

“Liar, it was clearly news.” Jiang Yushi mercilessly exposed him.

“You’re purposely asking when you already know.” Su Lifeng shook his head saying: “Why has Missy Jiang come to find me instead of sunbathing on the deck?”

Seeing him change the topic Jiang Yushi instantly rolled her eyes in disappointment, muttering saying: “Don’t talk about it, I’m about to be bored to death looking at the sea all day. If I’d known earlier I wouldn’t have participated

in this whatever cruise tour group... Originally they said it was to observe the climate change and biological species of the sea, but this route that we chose at the time for safety is honestly too uneventful. Of course, I'm not saying that peace isn't good, but at the least have a whale pop out to look at or something..."

"Uh..." Su Lifeng purposely acted shocked saying: "How come what I heard is that at the time when Zhang Hai mentioned to come out and do an observational cruise he had your full support? It also seems like a portion of their additional spendings on the boat were also paid by you, right Missy Jiang?"

For a cruise tour, even if it's just an offshore cruise on the China, Japan and Korea route the fee is still not a small price.

Even though when the university that Su Lifeng is at organized this group trip they used their student status and going for fieldwork experience as a reason and gained a bit of a discount, how can a regular student afford to use those recreational facilities on the ship...

A lot of students secretly spread rumours that Jiang Yushi has a good family background and that the reason these people can enjoy themselves so much is more or less because she secretly talked to the leader, Zhang Hai, and voluntarily shouldered the funds required for a couple of group activities. There are even some more malicious rumours saying that her family sponsored a batch of lab equipment which is why she was able to be successfully admitted to graduate school.

Although towards these kinds of claims, Jiang Yushi always just laughs it off: "Keep mocking me you ill-wisher, and did you not go to all of those activities? Besides, you don't look like you're enjoying this much. Tomorrow we'll return to Shanghai, a lot of people are making the best use of their time to have fun and yet you're hiding here leeching wifi... Is it because a lot of classmates from other programmes came so you're shy? Well this is news, the biology programme's most promising graduate student this year is actually such a shy person..."

Su Lifeng shook his head while smiling, he was just about to say that this isn't her first time meeting him, but he suddenly stared at the screen and let out a "Hm?".

“What’s wrong?” Jiang Yushi is extremely sensitive towards Su Lifeng’s reaction when looking at the computer, immediately asking with a face of gossip. Seeing her like this she really isn’t any different from regular female university students.

Su Lifeng moved the cursor and clicked a couple of times, he then said a bit regrettingly: “Nothing, it’s just that the internet’s gone.”

“Come on, just this, satellite signal on the sea being unstable is a common thing... Forget it, why am I talking to you about this, you definitely know more than me. Who knows why someone like you who learns biology is so interested in so many other fields.” While speaking, Jiang Yushi’s tone of voice had a small sense of defeat.

“The signal being completely cut off is a first...” Su Lifeng closed the computer and was in the middle of turning over his gaze wanting to say something, but his entire body suddenly froze.

The cafe that was bright and full of tourists just a moment ago is now suddenly a big mess. The glass is all broken and the walls became dented and uneven. Fresh blood is all over the ground but not a shadow can be seen...

Su Lifeng instantly felt like his heart had been lifted up, in the blink of an eye the scenery that he saw before him returned to normal. In his surroundings the sound of chatter and laughter of the tourist’s still traveled over, figures wearing bikinis leisurely moved about within the cafe.

Precog vision... This is the first time that he’s seen such a bloody scene, moreover the place of occurrence is actually on this boat...

In addition the vision is not over.

When Su Lifeng looked towards the couple at the neighboring table, he saw large amounts of blood on the bodies of the two lovey dovey people. The girl that was originally smiling at her boyfriend is lying on the ground crying out loudly, her boyfriend is lying at the other side unbeknownst of life or death.

“Ha...” Not waiting for the scenery to return to normal Su Lifeng hurriedly turned over his head, his entire being feeling a bit stunned.

“What’s wrong?” Jiang Yushi waved her hand in front of Su Lifeng’s eyes,

asking laughingly.

Su Lifeng slowly turned his gaze towards her, his heart extremely nervous. But thankfully there wasn't any sort of bloody vision that appeared on Jiang Yushi, but she is sobbing with a pale face, helplessly crying out a name: "Su Lifeng, where are you..."

That tone of voice filled with fear made Su Lifeng's heart feel stuffy, he'd never seen that kind of expression on this optimistic girl's face. Even though the vision flashed by very quickly Su Lifeng still subconsciously grabbed hold of Jiang Yushi's hand: "It's all right, I won't leave you behind."

Jiang Yushi was dazed for a moment, hurriedly pulling out her hand: "What's wrong with you, you make it sound like I'm afraid of you leaving me behind... Hey, what are you doing?"

Before she finished speaking she noticed that Su Lifeng abruptly stood up and looked outside through the glass window.

A decent amount of tourists are gathered on the deck outside of the window, in actuality, of the total 400 over tourists on the cruise ship over half of them are hanging out on this three level deck at this time, enjoying the last night of this trip.

Yet when Su Lifeng looked towards them, from their currently smiling faces he foresaw a different reality about to happen: This might really become the last night for a lot of people... On the majority of people there appeared the same vision as that couple!

"The cruise ship will arrive at the Shanghai dock tomorrow morning at eleven o'clock, and right now it is four in the afternoon... Which means that the calamity will definitely occur within these 19 hours."

"But, at what time exactly?!"

Su Lifeng's heart was panicking and in chaos, he looked towards the sea in the distance... Just like how Jiang Yushi said, this ship route has always been very safe, right now the weather is also relatively nice, everything looks peaceful.

That calamity that is about to create large numbers of casualties on the boat, what is it?

---

## Chapter 2: Prelude

There's always been a question on my mind. We all know that people listen to music in other languages when they have absolutely no clue what is being said. Most notably Japanese and Korean. But I've never heard of people listening to Chinese songs when they have zero understanding of the Chinese language. Does anyone here listen to Chinese songs while not know Chinese?

---

After calming down a bit, Su Lifeng suddenly pushed aside the chair and hastily ran outside while saying towards Jiang Yushi: "You stay here, don't go anywhere before I come back."

Jiang Yushi was baffled for a moment. Thinking of Su Lifeng's odd display just now she caught up to him and asked with concern: "Did something happen?"

"I need to go confirm something, you stay here..." Su Lifeng said. Right now he honestly felt a bit discomposed, but the reasoning developed from a long time exposure to a variety of disasters made him very clearly understand what he needs to do right now.

Find a crew member and ask if there's been any changes. Thinking of it now, there's definitely a connection between the signal getting cut off and the disaster scene that he foresaw.

But right when he hurriedly came to the deck, his path was suddenly blocked by a human figure.

This person was wearing a pair of briefs and carrying a water volleyball. He suddenly jumped over in front of him: "Yo, isn't this classmate Su who likes to isolate himself from the masses?"

Yet Su Lifeng who wasn't paying any attention at all to his surroundings did not see him and the two people instantly bumped into each other.

The latter staggered backwards, his mouth instantly cursing unhappily: "The fuck, are you blind!"

Only at this moment did Su Lifeng react over, but after taking a glance at him he didn't pay him any heed. He only casually said "Sorry" to him and then continued walking forward.

Briefs' name is Ma Chonghao, he is as tall and big as a horse and is very proud of the abs that he gained through working out. Adding that his pockets are deep he is very popular with the girls. But Su Lifeng is not familiar with him, the reason that he came out right now to "tease" Su Lifeng was entirely because he saw Jiang Yushi who was following closely behind him.

But he didn't expect that the result would be that he would get bumped, moreover Su Lifeng didn't have any thoughts of stopping as if he had some sort of urgent matter.

"Lunatic..." Ma Chonghao released a muffled complaint and glared at his back in annoyance.

The "Field Experience Tour" this time is organized by the students themselves, openly recruiting people during the break.

Originally Ma Chonghao did not have any interest in "marine life", the reason he came is because he saw Jiang Yushi's name on the flyer. But what put him in a sour mood was that after he came he never had the chance to talk and chat with Jiang Yushi, instead it was the urbane-looking little white face who looks like he doesn't have much strength who has a good relationship with Jiang Yushi... It's also said that the reason he came is actually also because Jiang Yushi invited him on her own...

But in front of Jiang Yushi he doesn't want himself to look too petty, so after he finished saying this one line he didn't look at Su Lifeng anymore.

Su Lifeng in particular did not even care about this kind of small matter... He also didn't have the mood right now. But he didn't expect that after just taking two steps he was once again stopped.

A male wearing a pair of glasses grabbed his arm and said: "Classmate Su, how come you don't apologize after bumping into Classmate Ma?"

It was Zhang Hai who is also a postgraduate student in the life sciences department like him.

This person entered a year earlier than him and follows that same teacher as him, he is a very old-fashioned person.

Towards Su Lifeng's title of "Postgraduate student with the most potential", he's always frowned upon it.

Su Lifeng shrugged him off a bit impatiently and said: "I already apologized, I still have something to do, if you've got a problem then we'll talk later."

Zhang Hai's expression became serious, he said unforgivingly: "What kind of attitude is that, who apologizes like you do, as your senior... Hey, Su Lifeng!"

Right now Su Lifeng did not have the time to talk nonsense with him. After taking a look at the crowd he very quickly discovered a crewmate and then walked straight towards him.

As for Zhang Hai, he glanced at the surrounding students and instantly felt like he had been embarrassed in public. Thus he also followed over: "I'd like to see what exactly you have to do..."

Ma Chonghao turned towards Jiang Yushi. Right when he put on a smiling face and wanted to speak with her, he discovered that Jiang Yushi had actually also followed over and he immediately became frustrated. He turned his head and took a glance, after thinking for a moment he threw away the volleyball in his hand and also followed over.

This crewmate was not far away from the swimming pool. To protect the safety of the passengers the ship crew always has people patrolling nearby, at the same time constantly checking the facilities on the deck.

This kind of crewmate is not a service personnel, but also unavoidably part-times as this kind of role. He also regularly encounters the queries of tourists and even requests for group photos and the like. But for this crewmate, the situation of a young man with a serious expression suddenly speed walking towards him with two males and a female following behind him is still pretty rare.

"Is there anything I can help you with?" The crewmate was very familiar with this student group and asked with a smile.

But Su Lifeng's reaction was very impatient, moreover the question that he asked also made this crewmate greatly surprised: "What's going on with the

signal on the ship? Just now it suddenly got completely cut off, what's the situation?"

"This... Don't worry, this kind of situation may be rare, but it is also possible. Please wait patiently, I believe that it will recover very quickly." The crewmate responded saying, while in his heart he said strangled: "Even if you're an internet junkie there's no need to be so impatient..."

Towards this kind of all-purpose response Su Lifeng was not satisfied. He furrowed his brows and wanted to continue asking when suddenly, he saw this crewmate with a formulaic smile on his face suddenly start to wail while covered in blood, beside him there was also a fallen radio...

After this vision disappeared Su Lifeng collected himself, directly looking towards the crewmate's waist: "Is your radio a professional marine radio? Can it have signal problems? Such as now?"

The crewmate was even more confused, but he still patiently said: "Under regular circumstances it will not. We are equipped with the most professional equipment, even if this kind of wireless radio is bathed in water for a period of time it can still be used after taking it out. Moreover radios have very high stability..."

"Can you please turn it on for a moment?" Su Lifeng did his best to make his request seem not too strange, due to this he acted calm and asked: "I am pretty interested in this."

But at this time, a harsh voice suddenly travelled over: "Su Lifeng, this is the important matter that you mentioned? Proposing such a laughable request towards the crewmate, interfering with the job of others and just causing trouble for people..."

Zhang Hai's face was full of mockery. He was thinking of the "accusations" that he could place on Su Lifeng's head while Ma Chonghao was secretly laughing at the side. Originally due to Jiang Yushi always approaching Su Lifeng on her own to talk he already saw him as a bit of an eyesore, and then he bumped into him just now...

Even though Jiang Yushi also didn't understand the details, but hearing Zhang Hai's words she looked at him in slight discontent. She was just about open her

mouth and speak for Su Lifeng but she suddenly heard Su Lifeng shout without even turning his head: “You shut up!”

“... You!” Zhang Hai was practically about to go mad with anger.

“If you don’t want to die in a bit due to a disaster then shut up!” Su Lifeng was extremely fed up with him in his heart. If it was during regular times he would have a hundred different ways to shake off Zhang Hai’s spite, but right now he doesn’t want to and doesn’t have the energy to deal with him!

Hearing the word “disaster”, Zhang Hai and co. were first dazed and then started to laugh from extreme anger: “Su Lifeng, have you gone crazy, moreover saying this on the sea. Are you trying to sensationalize and attract attention...”

“Yeah, what disaster. The weather right now is so nice, did you have a nightmare and then treat it as real?” Ma Chonghao finally couldn’t resist and said this thinking himself humorous.

But Jiang Yushi’s expression after listening up to here suddenly paled. Her heart fell into chaos and this time it was her who opened her mouth and cut them off: “Don’t talk anymore!”

Jiang Yushi is usually very good tempered. With her sudden aggravated tone, Zhang Hai and Ma Chonghao both couldn’t help but become dazed for a moment. Afterwards Ma Chonghao’s expression became cloudy...

The crewmate was also dumbfounded: “Boy, you can’t speak this kind of nonsense, if it causes some unnecessary misunderstandings...”

“May you please turn on your radio? You can choose not to believe me, but I can tell you that when you turn it on it will definitely have no signal. Why don’t we verify it.” But Su Lifeng stared closely at him and repeated his words.

The crewmate opened his mouth. He did not believe in Su Lifeng’s words but in the end he still helplessly pulled out his radio and pushed a button: “Boy, it’s impossible for the situation that you mentioned to occur. Now you should be able to relax and go back. The cruise ship docks tomorrow, you don’t need to be so nervous, you can go back and sleep...”

Yet he was unable to finish his words.

The moment the radio turned on it instantly released a wave of piercing noise.

The crewmate was a bit stunned. He hurriedly pressed it a few times but was unable to solve the problem.

“Str... Strange, what’s going on?”

And listening to that piercing noise, Su Lifeng’s expression completely froze.

In that vision that just appeared on the crewmate, that radio that he saw was also turned on and the noise that it released was precisely this noise.

This shows that the time of the occurrence of the disaster is definitely not too far away. But Su Lifeng still held onto a glimmer of hope, if only he could have a bit more time!

Not waiting for the crewmate to return to his senses, Su Lifeng already took in a deep breath and said towards him: “Now you should at least believe in me a bit? Please contact the captain, we are about to encounter a disaster at sea. Please ask him to immediately sound the alarm and make all preparations. I don’t know what kind of disaster it will but it’s better to believe it true than false, prepare as much as possible.”

After finishing speaking he didn’t pay any attention to the crewmate’s shocked expression. He turned his head looking towards Jiang Yushi: “Our rooms all have lifejackets. You come with me to go get lifejackets and then notify everybody to go get one.”

Jiang Yushi’s mind was in a state of chaos, for a moment she didn’t know what to ask. She only subconsciously asked: “Then... What if they don’t believe you?”

Su Lifeng glanced at Zhang Hai and Ma Chonghao who were at the side. After hearing the white noise from the radio these two people fell into a state of shock and disbelief: “Then all we’re doing is completing our last act of camaraderie.”

Everything has to be quick!

.....

There are five kinds of marine disasters while there are four kinds that can endanger this ship: Catastrophic tides, sea ice, tsunamis and storm surges. Additionally there’s also typhoons that are associated with atmosphere.

While recalling his knowledge towards marine disasters Su Lifeng made the best use of time to make preparations.

What made him a bit disappointed but was also within his expectations was that the alarm had not been sounded the whole time. Everything on the boat was as usual. He did not waste time to personally go find the captain. One is because he would very likely be stopped, two is because he honestly can't waste that time...

Up until this date the disasters that he's foreseen are all ones that would definitely occur. The result of putting all of his time in stopping it could very likely be hopeless. Moreover compared to going to persuade him, Su Lifeng is more willing to do all he can to create some initiative for himself and not placing all of his hope on the crew this kind of uncontrollable target.

In addition the reaction of the majority of students was also within his expectations. Some people started to laugh uncontrollably after just listening halfway through. Some people silently shook their heads, seemingly unable to understand why Su Lifeng suddenly started to go crazy, even fooling the girl with a lot of popularity in the entire school to go crazy with him.

There were also some who dubiously chose to believe in Su Lifeng. Yu Yihang whose relationship with him was passable for these couple of days was one of them.

"Lifeng, why do you have this kind of idea?" Yu Yihang is a very outgoing person. He likes to play music and other things and he is also relatively popular. The reason he's following Su Lifeng is not because he actually believes him but largely because he thinks that it's very interesting.

"Speaking of it how is this lifejacket worn. I remember they taught us when we boarded the ship but who remembers this... Oh right, Li Feng, if a disaster doesn't occur then it'll be really embarrassing for you. Just now I heard Zhang Hai say that the crew might call the police to detain you for spreading terror. Want me to go put in a word for you and have him let you off..."

Yu Yihang held onto the lifejacket and talked while struggling with it. The rest of the people were also mostly chatting. After they got their lifejackets they listened to Su Lifeng's arrangements and came to a meeting room with few

people that is also very close to the deck. This place also has big French windows, through the windows one can very clearly see the calm sea outside. Under this kind of circumstance a lot of people started to think that Su Lifeng was sure enough just delusional...

Only Jiang Yushi followed beside Su Lifeng the whole time. The expression on one of their faces was lost and nervous while the other's was abnormally heavy.

He just saw Yu Yihang's appearance, he was also covered in blood... A lot of the people here will die!

But he still didn't see what the surrounding lighting was like, he couldn't determine the time through the vision...

"Hey, I'll go to the dining hall to buy some biscuits, who wants water?"

"I'll get playing cards?"

"Actually, sitting like this and playing together is also pretty interesting. I saw a similar movie before, it was called 'Lichnyy Nomer' (Countdown). Everybody pretended they were about to die and then spoke out their last words before death..."

"What kind of stupid game is this. If you ask me my last words are that you're a freaking idiot."

"Oh, so that's how it's worn..." Yu Yihang said happily.

Yet right at this moment, without any warning the ship suddenly shook violently!

It's here!

Su Lifeng grabbed the railing beside him and then held onto Jiang Yushi!

---

## Chapter 3: Fog

April Fools!!! Can you spot the prank hidden within the chapter? (Hint: Don't trust strangers.)

---

“Bam!”

It was like the smooth sailing cruise ship had suddenly bumped into something and started to shake violently.

The sound of screams instantly rose up on the ship and inside of the meeting room, besides Su Lifeng who had reacted quickly and Jiang Yushi whom he was holding onto, the rest of the people all staggered and fell to the ground.

But there are a lot of things within the meeting room that can be used to stabilize oneself. They very quickly made instinctive reactions and grabbed at anything that could be grabbed around them.

“What’s going on? Did we hit a rock?” Someone shouted in fright.

Jiang Yushi tightly hugged Su Lifeng’s arm. She muttered subconsciously with a face of shock: “That’s impossible. This route is fixed, the ship has passed by here more than a thousand times, how could it hit a rock...” But she was also unable to explain why this kind of situation would suddenly occur.

“It’s not over yet.” Su Lifeng creased his brows and turned around bringing Jiang Yushi into his embrace.

“Crunch...”

After just finishing speaking a series of ear-piercing grinding suddenly sounded from all parts of the ship. Accompanied by a muffled “Bang” the French window abruptly burst apart.

“Ahhh!!!”

The screams on the boat quickly turned into a breakout of shrill cries. Su Lifeng lowered his head, listening to the sound of crashing glass behind him his face

was already completely white.

“Su... Su Lifeng, did you know that this kind of situation would occur?” Jiang Yushi was also trembling in fear and she couldn't help asking this with a shaky voice.

“I didn't know! Hold tight to me and don't move!” Su Lifeng answered.

Of all the marine disasters that he knows of none of them will create a situation where a massive cruise ship will be suddenly thrown around and crushed on a calm sea.

Moreover after the glass broke, this feeling of being crushed was still constantly travelling over from within the cruise ship. The cruise ship rocked and continued travelling forward, just as if it was pulled by something into the narrow gap of two walls... But looking outside everything was as normal, there was nothing outside.

Don't mention responding to this kind of marine disaster, it's not even possible to comprehend what's going on.

Maybe, this isn't even a marine disaster to begin with...

Su Lifeng also only did everything he could do to prepare, right now he can only trust in the visions that he foresaw before.

In this disaster he won't die!

Jiang Yushi who is closest to him will also be unscathed!

Two positives added together... Should also be a positive, right!

“What's going on!”

“Save... Save me!”

“Oh my God... The ship's going to flip!”

“What exactly is happening! ....Weep weep weep.....”

In a string of muffled noises and the shrill cries of passengers, Su Lifeng felt that all of the strength in his body was also being slowly snatched away.

As for Jiang Yushi who was in his embrace, she was also constantly trembling.

Su Lifeng squeezed out a strained line and roared: “Don’t be afraid! Stay here, we won’t die!”

“Bam!”

The final loud bang travelled over and Su Lifeng’s vision suddenly went black. His hand that was grabbing tightly onto the railing instantly let go on its own and he lost consciousness...

Coldness, silence...

After a long period of unconsciousness, the instant he woke up Su Lifeng abruptly sat up from the ground and looked at his surroundings.

After couple of seconds later he completely sobered up.

After he fainted over the cruise ship seemed to have stopped. The place that he was lying at was not too far away from that railing.

But under the circumstance that he did not receive a heavy blow why did he suddenly faint?

He felt his body. He was not injured, just a bit exhausted.

Su Lifeng looked to his side and discovered that Jiang Yushi had also fainted, her hand was still grabbing onto his arm.

Being pulled by him she also released a sound and woke up.

“Are you okay?” Su Lifeng shook his head and asked.

“I... I’m okay... It’s just that I fainted for some reason...” Jiang Yushi responded and also strugglingly sat upwards in a hurry. She asked a bit weakly: “Is everybody okay?”

The sky outside seems to not be entirely dark yet but it was all foggy. Looks like they weren’t unconscious for too long.

Borrowing the faint light he could see that the ground was littered with broken glass and there were also a lot of patches of blood.

A couple of human figures were sprawled on the ground. After hearing Jiang Yushi’s call they all moved in succession.

“I’m fine...”

“I’m also good, I just hit my head, thankfully it’s not bleeding.”

“Somebody come help me up, my legs are like jelly.”

“Oh my God! Classmate Su was speaking the truth!” One girl stood up in shock. She stared blankly at her surroundings and then couldn’t help but start crying.

Jiang Yushi walked over and hugged her, gently comforting her: “It’s okay it’s okay, Cheng Xiaomei, you’re okay now...”

Cheng Xiaomei nodded her head and eventually calmed down a bit.

Her expression looking at Su Lifeng right now was already entirely different. At this moment, this unfamiliar boy who wasn’t even in the same programme as her looked quite dependable.

“Let’s go help everyone else.” Jiang Yushi said.

Cheng Xiaomei hurriedly nodded her head: “O... Okay.”

On the other hand, Su Lifeng who was in the process of looking around suddenly froze...

This scenery is exactly the same as the vision that he foresaw before, but at the same time there’s also a massive difference.

“Why’s Yu Yihang gone?” Su Lifeng stared at the pool of blood on the ground and asked.

The blood was still fresh and regardless of whether it’s from the amount of blood seen or from the result that Su Lifeng foresaw, Yu Yihang is seriously injured.

Where could this kind of wounded person go?

“Gone? That’s not possible... Hm, Chen Haifa is also gone...”

“And He Yao, she’s also missing!”

After the other university students sobered up they also released alarmed shouts.

The names that they mentioned are all people that Su Lifeng saw injured in his visions.

Su Lifeng was originally a bit scared of the numerous wounded and corpses that he was about to see, but what he never expected was that these people were actually all gone already.

“There’s a lot of blood here... Look, isn’t this He Yao’s cell phone! It’s covered in blood!” Cheng Xiaomei suddenly shrieked and then picked up a cell phone covered in fresh blood. She said with a deathly pale face: “Could it be that emergency rescue personnel brought them away?”

This explanation instantly obtained the support of the others. One boy even smiled gladly: “That’s definitely it. Thank god everybody is okay and we’re still alive.”

“Yeah, it’s all thanks to Classmate Su. Although what was that just now? You should know something, right Classmate Su?”

“This weather doesn’t look too good, it’s all dark and overcast.”

A couple of people continued to chase after Su Lifeng for answers.

But Su Lifeng was still staring at the blood. He then frowned and asked: “There’s only one medical care room on the ship, how could help come so quickly? Even if there really was help, then why didn’t they also wake us up?”

These people were all clearly in a bit of a panic. Seeing this kind of situation their first thought was actually that the people had all been saved...

Jiang Yushi evidently sensed something wrong just like him, but she still said: “Don’t be so nervous Lifeng, everything’s fine now. The ship is only so big, where could they go? Let’s go look for them and check up on the other students while we’re at it...”

“Yeah, everything’s already okay.” Cheng Xiaomei nodded her head and said so, seemingly speaking to herself.

But Su Lifeng waved his hand, after two seconds of silence he suddenly asked: “Everything’s okay now? Then I want to ask, do you guys hear the sound of waves?”

When he said this line his face had already become extremely pale, his tone of voice was also a bit panicked.

Everybody was dazed and Jiang Yushi immediately started to listen.

Outside it was terrifyingly silent...

Jiang Yushi's face slightly paled and she stood up running outside.

Very quickly she released a shocked cry: "God... Where is this?"

Everybody looked at each other and suddenly developed an inexplicable sense of fear.

In the dense fog the cruise ship that was heavily deformed from being squished was stopped quietly on the sea.

And within visible range all they could see was the deep, dark surface of the water that was like a pool of dead water.

Farther away was entirely covered by an endless fog.

Everybody was shocked speechless by the scenery before their eyes. Su Lifeng stared at the fog, an even worse feeling shortly surfaced in his heart.

Right now he hasn't seen anything yet, but he can be certain that the disaster is not over yet.

"I'm going to the deck to take a look." Su Lifeng suddenly turned around and left.

He has a very strong feeling that he only foresaw the first half before.

And right now the reality is that the wounded are missing.

Jiang Yushi immediately followed over, Cheng Xiaomei also hurriedly followed behind in a fluster. After hesitating for a moment the others also did the same thing.

On the boundless sea, the unknown and isolation represent the greatest terror... And Su Lifeng clearly knows more than they do.

Along the way Su Lifeng did his best to observe every detail that he saw. From the shell of the ship, the entire cruise ship was virtually as if it had been heavily scratched by a massive piece of sandpaper.

He can't imagine what kind of natural disaster could create this kind of phenomenon.

The people on the deck also seem to have all fainted, at this moment they were also starting to wake up intermittently.

All over the place was the sound of light weeping and Su Lifeng was rapidly moving in the crowd and scanning them.

He was looking for those injured people that he foresaw before....

Not here, not here...

Even that crewmate was gone...

And at this moment somebody on the ship finally cried out in terror: "My girlfriend is gone! Has someone seen her? There's so much blood here, she's definitely hurt..."

"My friend's also gone! I was hiding with him here just now!"

"Little sis, has anyone seen my little sister!"

In the wave of bewildered cried Su Lifeng stopped outside of the cafe.

Right now there only remained a pool of blood in the place where the couple is his vision should be lying, along with a scrap of cloth from that girl's body.

He instantly thought of the scene of that girl screaming in misery.

Then looking at the reactions of the surrounding people, evidently nobody heard it.

When she cried for help everybody was unconscious, besides...

"The wounded!"

At the same time that this thought appeared in his mind, a couple of images suddenly flashed by in front of his eyes.

That girl and her boyfriend were within it, the girl was still shouting in a panic: "Help... Help!"

Yu Yihang's figure also flashed by. His eyes were tightly shut and his entire body was trembling without stop...

Right at this moment a shadow suddenly flashed by in the fog...

Su Lifeng instantly felt like his heart had been grabbed. A sense of unspeakable

fear instantly enveloped his mind.

“Ah!”

Following a low roar the vision vanished all at once.

Su Lifeng gasped violently, only after a long while did he recover the feeling that he was still standing on the ship.

“I... I will die?”

He was dazed for two seconds and then suddenly ran to the side of the ship.

“Classmate Su, what’s wrong?” Cheng Xiaomei asked nervously.

But without the need for Su Lifeng to respond they also already knew.

In the distant fog a black line faintly appeared...

“That is... an island...” Jiang Yushi opened her eyes wide in disbelief and said.

## Chapter 4: The Missing

Check out loser.com. I think you'll have a decent laugh. Although you'll probably only laugh if you're in Canada or U.S.A

---

"I want to go on the island." Su Lifeng suddenly said.

Jiang Yushi looked turned around her head stunned. She asked: "What did you say? But, but the situation right now... Shouldn't we wait for the arrangements of the crew?"

"You don't understand. This is not a marine disaster, the crew themselves don't even understand the situation. Those missing people, they are right on that island!"

"What?" They are all on the island? But... But how did they get over?" Cheng Xiaomei was dazed upon hearing this and then subconsciously asked this question.

Su Lifeng said: "I don't know, but no matter what it is very dangerous on the island. But if we continue to stay on the the boat then that is no different from waiting to die. So..."

Right at this moment Cheng Xiaomei suddenly let out a sharp cry.

She pointed in the direction of the island and said: "There's... There's a person! Classmate Su, you're right, they really did go to the island!"

Speaking here she raised up her arm and excitedly waved her hand in the direction of the island.

But very quickly she turned her head slightly puzzled: "Classmate Su, what's wrong?"

Su Lifeng grabbed her arm and was staring at that place with a pale expression. He said in a low voice: "Something's wrong..."

In the fog not only one figure appeared on the island, one of them he recognized with one look.

That is the male of the couple.... Right now he is walking at the very front and his movements look a bit uncoordinated.

But regardless of the vision from before the disaster or the one just now, in the visions that Su Lifeng saw he was always unconscious...

As a matter of fact, the him that he just “saw”, his entire body was still like a loose frame with one arm sticking outward!

But right now he has suddenly appeared at the coast...

At the same time that Su Lifeng was staring at him, he sensed that the male also seemed to look in this direction.

When their eyes made contact, Su Lifeng instantly felt a sense of inexplicable fear.

That black figure!

In the vision when that black figure appeared he had this exact feeling!

And then the next moment, he clearly “felt” himself get killed by the black figure.

“No, we can’t allow them to board!” A bad premonition instantly surged in Su Lifeng’s heart.

Regardless of what those black figures are, at the very least he can confirm that there is definitely something wrong with those “people”!

That male’s gaze looking at him was like he was looking at a lowly and strange insect. It carried a curious sense of inquiry along with indifference.

Closely afterwards that male suddenly slowly raised his arm and then started waving it towards them.

More human figures followed closely behind him and did the same action... In the fog these “people” started to waved their arms at the cruise ship!

Su Lifeng was distracted for a moment and then slowly released Cheng Xiaomei’s arm.

They’re actually... imitating Cheng Xiaomei.

At this moment the other tourists had also discovered that island along with

those human figures.

A lot of people with missing friends and relatives even cried in joy. Some people started attempting to put down the lifeboats.

The man who was shouting “Little sis” the entire time suddenly pointed at a short figure and shouted aloud. He then jumped into the sea with a “Splash”.

“Su Lifeng, I see Chen Haifa! Thank god, he doesn’t seem to be injured.” Jiang Yushi did not sense Su Lifeng’s abnormal expression.

At this time a pleasantly surprised shout also travelled over from not far away: “So they went to the island! It really was... unpredictable. And I thought that they were injured. Who would have thought that they woke up even before us and even discovered an island!”

Su Lifeng turned back and looked. With one look he saw Zhang Hai who was standing together with the rest of the students.

His face was deathly white with a badly shaken look, one of his eyeglass lenses was also shattered.

After discovering Su Lifeng he quickly walked over: “Classmate Su, why didn’t you say things clearly before? You must know the current situation, right? I think that we should also go on the island. The ship presumably won’t be fully repaired for some time, maybe we’ll even need to stay on the spot to wait for help... Those classmates all boarded the island first, maybe we can find some rare flora and fauna. Don’t you see that the vegetation is greatly different from what we usually find? This really is a blessing in disguise...”

Yet Su Lifeng didn’t want to waste his breath with him, because he once again foresaw the scene of large amounts of tourists covered in blood...

This time, it was no longer a portion of the people but everybody!

“Forget it, ignore him, let’s go too.” After Zhang Hai was ignored by Su Lifeng, he turned his attention towards the actions of the other people.

But the lifeboats haven’t been put down yet and not everybody dares to jump into the sea.

“Little sis, big bro’s coming right away!” That man’s excited voice travelled

over from the sea.

Su Lifeng's heart jumped and he hurriedly shouted: "Don't go over!"

But that man didn't hear his voice and very quickly rushed out of the water, climbing to the shore in great strides.

In the fog everybody heard his voice disappear for an instant, his body also seemed to freeze for a moment.

But Su Lifeng clearly "saw" what happened...

That man joyfully went ashore, but the human figure at the front suddenly pounced over and opened his/her's mouth biting into his throat.

His body twitched violently and his mouth constantly released low roars.

But through the fog and on the cruise ship, everybody was excitedly staring at his looming figure, looking forward to what he will do next!

"Save... Save me..." The man really wanted to shout this out but he was already unable to speak.

He looked in the direction of his little sister... That petite girl was staring straight at him, a very unfamiliar feeling was revealed from her eyes.

But very quickly, this feeling seemed to slowly becoming familiar, just like... a peer...

"Why is he coming back?" Cheng Xiaomei said a bit surprised.

Everybody else also became restless, because besides that man who turned around and started to walk back into the water, the rest of the human figures actually also followed behind walking into the sea.

"Ah... My girlfriend doesn't know how to swim!" A slightly older man said stunned.

But the situation occurring in his vision put him in disbelief, because following that man starting to swim, the rest of the wounded also all made the same movements.

The exact same swimming style...

Su Lifeng abruptly returned to his senses. He grabbed Jiang Yushi and said:

“We’ll jump into the sea from the other side, do you know how to swim?”

“I know...” Cheng Xiaomei was actually also paying attention to Su Lifeng’s reaction the entire time. She extended her arm grabbing the corner of Su Lifeng’s shirt and then said so a bit weakly.

Su Lifeng glanced at her and then looked at Jiang Yushi. He then said: “I’m not sure if my judgement is correct. Just like before, I can only say I’ll do my best...”

“I believe you!” Jiang Yushi answered first.

Cheng Xiaomei nodded her head.

Su Lifeng looked towards the sea. The movements of those “people” were stiff, they did not swim very quickly. After making eye contact he’s always felt like that male has been staring at him the whole time...

“Good, don’t say it out loud. Go tell the other classmates about it, if they don’t believe you guys then have them stay as far away as possible from those people. Also, have them do their best to tell other people... I’m just afraid that it’s too late.”

When Su Lifeng spoke up to here, a crisp sound had already travelled over from the side of the ship.

That male who had already died in his vision had already taken the lead and swam back to the side of the cruise ship. He was in the middle of attempting climb up the high up shipboard.

“Quickly, pull him up!”

The people on the boat all shouted out happily and excited.

Su Lifeng tightened the life-jacket on his body and then silently scanned the floor, picking up a steel pipe that broke off in the compression...

“Let’s go. Try to find something to use as a weapon along the way.”

He grabbed onto Jiang Yushi and Cheng Xiaomei who had just finished speaking to Zhang Hai and hurriedly rushed over.

But there were only a few people who believed him and followed over...

“Ah...”

That male grabbed the rope, and behind him, the male of the couple also swam over to the side of the boat. He was lifting his head and observing those excited tourists above using an expression of slight anticipation...

---

## Chapter 5: Change

I got nothing.

---

While the deck was filled with cheers, Su Lifeng quietly lead everyone and went around to the other side of the cruiseship.

These people clearly didn't know what the meaning of a "weapon" was and picked up a bunch of random stuff.

Rather it was frail bodied Jiang Yushi who knew to follow suit. Along the way she found two chair legs and then handed one over to Cheng Xiaomei.

Cheng Xiaomei frantically took it over in her hand, wonder if she knows how to use it.

"In a bit if we hear yelling we'll jump off from here." While speaking Su Lifeng carefully looked towards the sea.

There were still a lot of "people" swimming towards the cruiseship. After "witnessing" the scene of that man being bit, even though he can't see the faces and expressions of these "people", Su Lifeng could still feel that strange aura emitted from their bodies.

Their hand waving action was learned from Cheng Xiaomei, as for swimming they suddenly learned it together with him after the man was bitten.

"Many organisms possess collective learning behavior such as geese migrating and worker ants going out to feed in clusters. But I've never heard of everybody knowing after one person learns it..." Su Lifeng's heart was actually also very frightened, he was far from being as calm as he appeared on the surface. Having foreseen so many disasters, only this one was truly happening to him.

Prior to this he was nothing but a student who went in and out of the library or spent all day in the laboratory. How could he predict that the day before returning home he would encounter this kind of "crossing the Bermuda" situation?

This sea area is not like a regular sea at all!

But these people by his side are all depending on him... Jiang Yushi's hand holding the chair leg was trembling the whole time, but her gaze looking at him was always filled with trust.

Su Lifeng scanned her body and only just discovered that there were a lot of bruises on her elbows and knees.

The "princess" who would always make a fuss if she got a small papercut was actually not crying out in pain right now...

Noticing Su Lifeng looking at her, Jiang Yushi's eyes curved and she gave a light smile to him.

"Yelling? What yelling?" A guy who was already following Su Lifeng beforehand asked a bit puzzled.

Even though right now he doesn't dare to not believe Su Lifeng's words, his mind is still the same as the majority of people and he can't imagine what will happen.

The other few people were actually about the same as him, the atmosphere on the cruiseship right now was filled with the exultant joy of survival.

Moreover, fundamentally speaking they really wish that Su Lifeng is just overthinking.

They're all regular university students, nobody wants to face a situation more bizarre than right now!

Su Lifeng did not answer and made a hand gesture to be silent...

After a couple of "people" were successively pulled up onto the deck by the rope, a couple of eager tourists instantly surrounded them, opening their mouths and asking questions while greeting them: "Excuse me, have you guys seen my friend? She's about this tall and is wearing a flower-patterned bikini..."

"Oh right, why did you guys all go to the island?"

"I saw a couple of crewmates, did they take you guys over? In that case you guys went to the island to seek help?"

"What's on the island?"

“Knock it off everybody, don’t you guys see that they’re all injured? Let them sit!”

“Yeah, their injuries look really serious...”

Yet, in their voices of conversation these “people” were silently watching them the whole time.

Their gazes and expressions looking at the people were virtually identical.

While their eyes turned it was like they were observing the every move of these people.

A middle-aged woman grabbed towards the male of that couple: “Lad, don’t just stand there, look at how injured you are...”

“Kacha.”

Everybody instantly fell silent.

The middle-aged woman’s entire body froze, her face was as pale as ashes.

On the other hand that male looked a bit curiously at the reactions of everybody, he then followed their line of sight and looked towards his arm.

His hand... was pulled off ...

But the broken off section did not bleed profusely, instead a viscous jelly that was a bit like a mixture of fat and blood dripped out...

After a whole two seconds that middle-aged woman suddenly released a shrill cry and threw away that hand that was “pulled” off by her. She attempted to back up: “Ah!!!”

“Jump!” Su Lifeng immediately said.

That male seemed to have realised something from the middle-aged woman’s reaction. He fiercely pounced forward, his broken arm thrusting into that middle-aged woman’s abdomen.

His body started to rapidly “collapse” at a discernable rate, and that jelly-like substance crawled into the middle-aged woman’s body like it was alive.

In her wide-opened terrified eyes her belly instantly swelled up, on the surface of her belly is was like there were bugs crawling around.

Very quickly these “insects” crawled to every part of her body, but that male did not simply die with this like Su Lifeng “saw” before. Instead he supported his virtually half-decomposed body and pulled out his broken arm.

The middle-aged woman’s entire body spasmed. By the time she calmed back down her expression had already become exactly the same as the rest of the “wounded”.

“Don’t just stand there.” She opened her mouth a few times and then used a dry tone of voice, squeezing out the line that she just said.

This all happened very quickly, only until this middle-aged woman turned around and looked towards them did the surrounding people finally react over from their shock.

“Look at how injured you guys are.”

“M... Monster!”

In the sound of shrill cries everybody started to scatter and flee.

Yet, on an unmoving cruiseship like this where can they escape to...

At this moment even more “wounded” also followed the rope and climbed up. The deck instantly became a mass of chaos.

After a group of tourists were converted into members of “them”, the rate of diffusion instantly increased by many fold...

However, that male who was as if he had “dissolved” did not continue to attack. Instead he turned his head and started to search left and right.

The reactions of these people look to be about all the same, but before he saw one with a different reaction.

Suddenly he sniffed and then his gaze skipped over the deck and looked towards the other side of the cruiseship...

After Su Lifeng yelled “jump” he immediately grabbed Jiang Yushi and flipped over the railing. He then took a deep breath and jumped down.

After revealing a hint of nervousness Cheng Xiaomei also closed her eyes and jumped.

As for that guy who asked the question, after a brief moment of hesitation and doubt he turned his head and took a look.

But just this one look made him instantly terror-stricken.

A human figure suddenly pounced down from the top of the cabin, accurately knocking him to the ground.

This human figure lifted up his head, his close by face was still constantly shedding.

He looked at the railing, seemingly coming for a certain person.

“Save...” This guy was virtually scared limp by the scene before his eyes, he couldn’t even release a sound.

“Pu!”

The human figure abruptly lowered his head, opening his mouth and biting the guy’s face.

The guy’s four limbs immediately tensed, he clearly felt something crawl into his face and then crawl into his brain and his entire body...

“Ah!!!”

The other few people instantly reacted over horror-stricken and all jumped into the sea one after another.

“Class... Classmate...” Very soon the guy staggered to his feet and stiffly spit out a few words, “Classmate Su...”

## Chapter 6: Xenobreed

I'm completely out of things to say. Here's a joke I found.

A mental patient is writing a letter, the nurse asks: "Who are you writing a letter to?" The patient said: "Myself." The nurse then asks: "What's the letter about?" The patient: "Are you mental, I still haven't received it yet how do I know?"  
HAHAHAHA!!!...

---

"Splash!"

Water splashed in all directions.

"Ah! He came down! Don't come over Cheng Peng!" The last boy who jumped down exclaimed. Cheng Peng whom he spoke of was precisely that boy who was just turned.

Who would have thought that he actually also followed and jumped down...

This boy clearly isn't that good at swimming, in his panic he was randomly flailing around.

"Classmate Su..." Cheng Peng's movements were still the same as the group of wounded who "learned" how to swim, he appeared relatively rigid but his speed was clearly a bit quicker.

Hearing him call his name Su Lifeng was also dazed for a moment.

He looked at Cheng Peng and discovered that a chunk of meat had been ripped off of his face, but the wound revealed was not blood red, instead it was like dissolved jelly. Moreover it was constantly flowing outward showing that the wound is very deep.

Something crawled into his body... Su Lifeng instantly reacted over.

It's not those "wounded" who are the problem, it's this jelly substance in their bodies!

After this jelly substance crawls into the human body, it will not only turn the human body into this state, it will also make them lose their self-conscious.

Because even though Cheng Peng is calling his name, his tone of voice is completely flat...

At the same time Su Lifeng also discovered that after these things shift targets once, the turned human body will also appear a bit more “advanced”.

Before it learned how to swim, now it’s even learned how to speak...

“Help! Save me!” That boy desperately tried to distance himself from Cheng Peng while breaking down and shouting.

Seeing a person who was still a classmate a few seconds ago suddenly turn into a monster and then thinking of that despairful performance when Cheng Peng was knocked down... This feeling of extreme fear is indeed unbearable for a regular person.

“Bam!”

Seeing that Cheng Peng was already very close to him, a black light suddenly brought up a splash and arced across in front of him, heavily smashing Cheng Peng’s head.

“Ah!” The one who released a scream was instead that boy.

But the next moment he returned to his senses, it was Su Lifeng who saved him...

“What the hell are you doing! Fight back!” Su Lifeng roared angrily.

“Fight...” Only now did the boy remember that he has a “weapon” in his hand, even though it’s just an iron sheet...

He instinctively wanted to say “Do you want me to kill Cheng Peng”, but very quickly his eyes suddenly became fearful but also savage: “That’s right, he’s a monster!” He’s no longer Cheng Peng...”

Cheng Peng very quickly popped out of the water again. The boy virtually subconsciously stabbed the iron sheet over: “Fuck, go die!”

“Pu!”

Another hole was stabbed into Cheng Peng’s face but he was still expressionless, his eyes were even still looking at Su Lifeng: “Classmate Su...”

“What do I do, he’s not dying!” The courage that the boy just mustered up was instantly exhausted.

“Lifeng, be careful...” Jiang Yushi was being held onto by Cheng Xiaomei, the faces of both girls were filled with horror. Cheng Xiaomei said so in a quiet voice while crying, while Jiang Yushi was biting her lip not daring to speak, afraid of disturbing Su Lifeng. In her memory, even though Su Lifeng runs and exercises every day, inside he is a very civilized person. Don’t mention this kind of life and death struggle, even the number of times he’s fought probably isn’t a lot...

But looking at that boy and the other boys, it also seems pretty difficult for them to go fight for their lives.

If Su Lifeng fails, then...

Su Lifeng was indeed a bit frightened in his heart, but at the thought of the scene of him being killed in his vision... He instantly bit his teeth and raised the steel pole, heavily smashing downwards: “Don’t act like we’re close, I don’t know you.”

“Bam!”

“Bam Bam!”

This time, Su Lifeng did not wait for Cheng Peng to pop out of the water again and consecutively smashed him many times.

Only until he felt that even his wrist was a bit sore did he finally stop.

Cheng Peng’s head was already virtually smashed to bits. He twitches a few times and a black thread-like object suddenly wormed out from his injury and shot into Su Lifeng’s wrist.

“Ah!”

This time it was Su Lifeng who cried out in fear, the steel pole nearly fell out of his hand.

Did his prediction turn into reality!

He hurriedly looked at his wrist but only discovered a small red dot, like it was left behind by a needle.

It didn't hurt or itch.

After staring blankly for two seconds Su Lifeng suddenly returned to his senses and looked towards that boy beside him who had already become completely stupefied.

He didn't notice...

Which means that nobody else noticed either.

The speed that the black thread appeared was too quick. Everybody's attention was on Cheng Peng, nobody perceived what just happened.

Even if they heard Su Lifeng's yell, they would just think that it was due to Su Lifeng killing a human being for the first time and in turn becoming scared himself.

But in reality, after that black thread wormed into his wrist, only question and panic remained in Su Lifeng's mind and he instead didn't have much thought about the matter of killing a human.

.....

"The door is open..."

"Enter into this world..."

"Evolutionary material..."

"Absorbing this evolutionary material, the xenobreed can evolve again..."

"After absorbing all of the evolutionary material, this world will also be no more..."

Another precog vision flashed by before Su Lifeng. What's different is that this time, besides seeing the dark sea surface along with the blood that was slowly spreading in the water, he also heard large amounts of whispering.

And that tone of voice was exactly the same as when Cheng Peng said "Classmate Su" ...

"We'll wait here first." Su Lifeng suddenly lifted his head and said towards Jiang Yushi and co.

.....

Help! What kind of monster is this!”

“No, don’t come close... Ah!”

Tourists were constantly knocked down while running. Looking at these appalling scenes, Zhang Hai and co. were in complete regret... If they’d known earlier they should have just listened to Su Lifeng!

There is not only a problem with these “wounded” like he said, they’re complete monsters!

They turn a person upon encountering one, they’re practically like the plague!

Zhang Hai’s entire body trembled and he said with a quivering voice: “This... This is too shocking, how can there be such organisms...”

“Why are you speaking this nonsense right now! What should we do!” A girl screamed and cut him off.

Shua!

Not far away, a young woman who was just turned instantly turned her head around and looked at them.

“Hu... man.” The woman said, she grasped two new words, “Teenager...”

She surveyed this group of university students who had already been scared bloodless, her eyes suddenly revealed a hint of satisfaction and she suddenly rushed over.

After this woman turned her speed was clearly a lot faster than before. A student’s reaction was a bit slower and he was grabbed by her.”

Help me!”

“Jump into the sea, jump quick!”

Another university student released a shrill cry and jumped into the sea first

Zhang Hai stared blankly at the sight of swelling and worming that appeared on that student’s face. Only until his expression slowly turned from despair to indifference did he suddenly return to his senses and also jumped into the sea.

From beginning to end nobody saved this student, everybody was already scared silly...

With nowhere to go a lot of tourists also jumped into the sea. After just one minute the deck returned to silence, only the sound of splashing and crying that constantly travelled over from the sea remained.

Dozens of decayed corpses lay on the ground, they were all the first group of wounded.

These newly born monsters were clearly a lot brighter than before... At first they were still learning how to wave, but now they've already grasped even more human behaviours.

A girl with a sexy figure but with flesh dripping from her face picked up a volleyball. After pondering for a moment she suddenly lifted her hand and threw it out.

“Bam!”

This volleyball bumped into the cabin in front and instantly left behind a shallow depression.

This is an action the girl originally knew, but this strength is not something that she possessed when she was still a normal human.

“Hehe...” The girl's face was stiff for a moment, she then opened her mouth and revealed a very strange smile. She formulated a complete sentence word by word, “I... like... these life forms... humans... The “world” opened up this time is not bad... This place is called... Earth...”

Very soon they walked over to the side of the ship, but they were not in a rush to jump into the water. Instead they looked down from above and silently stared at the people in the water.

Every move of these tourists seemed to feel so fresh to them...

“Do we also... need to assimilate them... as carriers of we xenobreed?” That middle-aged woman who was turned asked.

A different crewmate beside her responded saying: “No... No need... These organisms... humans... may be very good,... but... their biological structure is too complicated, at the moment they are still too difficult to completely absorb, the disintegration rate is too fast...” While speaking his eyeball on one side had

already turned into jelly and slid down, “We can use them... to test... how the other life form is like...”

Hearing this, these organism that call themselves “xenobreed” unanimously nodded their heads...

Everybody swam in the direction of the island, but at the same time there were also tourists crying for help who didn’t know how to swim but jumped down after breaking down.

Unfortunately, under the circumstance where everybody is desperately trying to distance themselves from that group of monsters, there isn’t anybody who would turn around to save them.

“Classmate Su, are we not going over yet...” Beside the ship, Cheng Xiaomei listened to the surrounding movement and secretly asked with red eyes.

Cheng Peng’s corpse was right beside them, this kind of feeling was honestly too uncomfortable.

And the voices that travelled over from the ship and the water also made them develop a sense of inescapable despair.

“Wait a bit more.” Su Lifeng said.

While speaking he couldn’t help looking at his wrist again.

What was a bit strange is that the red dot had actually already disappeared...

“The wound’s gone?” Su Lifeng extended his hand and rubbed it.

Right at this time, ripples suddenly appeared in the surrounding water.

“It’s starting!” Su Lifeng immediately revealed a very vigilant expression and said in a low voice: “Everyone, do your best to stick to the ship! Also, pull Cheng Peng’s body over!”

## Chapter 7: Slaughter and... Observation

You know, most people find it pretty hard to come up with something that they like the best. You ask someone what their favorite food is, they'll probably give you a list. But if you told them to only pick one, they'll probably hesitate for half a day before giving an indecisive answer. If I had to say one thing that I like the best in a certain category... In the category of thin strips of smoked pig, I have to go with bacon.

---

The scene of Su Lifeng decisively killing Cheng Peng along with his absolute tone of voice all made his words have a feeling like an order in the ears of the others.

After the words had just left his mouth, the remaining few boys immediately fought back their nausea and fear and pulled Cheng Peng's body to the side.

As for that boy who was scared silly before, even though he reached out his arm, he was a step slower.

He couldn't help but glance at Su Lifeng. Discovering that Su Lifeng did not notice him, he immediately released a breath of relief.

But thinking of that scolding when Su Lifeng saved him along with the savage attack that Su Lifeng conducted on Cheng Peng afterwards... The boy's heart shivered. He held tightly onto that iron sheet, his face slowly turned from pale white to pale with rage...

"Listen up everyone, in a bit no matter what happens, you guys have to stick close to the ship and not move. No matter what, do you guys understand?" After instructing them, Su Lifeng glanced without much confidence at Cheng Peng who was floating in front of him: "Hope this body can fool them..."

"Fool? What do you mean fool?" One student's heart jumped and he asked. He looked towards the pitch-black water and instantly developed a bad feeling...

In an instant, everyone felt the time become very long...

"Su Lifeng, do you think we can still go back alive?" Jiang Yushi stuck closely beside Su Lifeng. She was lightly clothed to begin with and right now, under the

effect of the cold seawater and fear she was slightly quivering. After getting wet her thin white shirt had become part seethrough, sticking closely to her beautiful mountain peaks of considerable size and perfectly outlining her beautiful but rarely revealed body.

Yet, facing such a beautiful scene, Su Lifeng was not currently in the mood to admire it. He turned his head and looked at her. He suddenly extended his arm, brushing off some water droplets hanging on her face. He then brushed the wet hair sticking to the side of her face behind her ear and very firmly nodded his head saying: "We can, we'll definitely go back alive!"

Jiang Yushi exchanged gazes with him, her eyes slowly became a bit red... Afterwards she also nodded her head heavily: "Yeah! Then if we go back, tell me your little secret!"

"Taking advantage of the situation, you wish." Su Lifeng was slightly dazed for a moment and then said so snappily.

Jiang Yushi was stunned and then amused: "Come on, that's how you see me?"

Cheng Xiaomei who was at the side seemed to also want to laugh along, but just moving the corners of her lips, tears started to fall down again.

For heaven's sake, she's just a regular female university student. Why did she encounter this kind of situation...

Splash!

A massive splash suddenly interrupted her thoughts.

Accompanying the water droplets that poured down like a rainstorm, the pupils of the students all shrank and their faces were ashen!

Su Lifeng also felt like his heart had been squeezed...

"Fuck, what is this thing?!"

In his vision, he sensed that there exists danger below the water.

But he never thought that it would be like this!

Looking at the massive creature that appeared before his eyes, Su Lifeng instantly understood the meaning of that line.

“Absorb materials, xenobreed evolution...”

That “jelly” in Cheng Peng’s body that replaced his actions and thought is a “xenobreed”.

They enter into the body of the “material” and then replace them.

From the words “absorb” and “evolution”, this behavior of occupying the body of the material is the xenobreed’s way of life.

Adding the learning ability that they displayed before, Su Lifeng believes that the behaviour of replacing the “material” and constantly changing “materials” will spur the evolution of the xenobreed.

As a life science grad student, Su Lifeng has never heard of this kind of organism existing on Earth...

And “material” is not only pointing towards humans.

This term also includes other creatures...

“We aren’t the only one’s who entered into this area...” Su Lifeng muttered.

“Ah!”

The tourists in the sea suddenly released waves of screams.

Two massive “xenobreeds” suddenly appeared in succession from the bottom of the sea, one of them just happened to be in the most crowded area!

“This is... a squid?” One boy just said so while dumbstruck and was then caught by a tentacle and thrown into the air, instantly getting ripped into pieces!

Flesh and blood scattered down and was thrown towards the crowd by the squid xenobreed.

A couple of people were instantly drenched by blood. Looking at the pieces of flesh floating in front of them, one girl’s movements suddenly stopped, freezing on the spot.

The intense stimulation made her lose the courage to resist...

Not only her, in the sounds of screaming the other people also fell into despair and negativity. They practically didn’t even struggle much before being ripped apart by the squid’s tentacles.

“The human species... will be affected by the experiences of their own kin...”  
On the deck of the cruiseship, that girl said so in a low voice while staring in curiosity at everything happening in the sea.

The rest of the xenobreeds were also silently watching, this scene formed a stark and strange contrast with the sea.

“Ah...” The position of Su Lifeng and co. is fairly far away from the crowd, but the blood that tainted the sea red still drifted to their surroundings, the limbs especially scattered all over the place in an instant. There was even half a body that was thrown near them. Jiang Yushi’s lips were pale and she bit her bottom lip. She then covered up Cheng Xiaomei’s mouth before she could scream.

“It’s okay... It’s okay...” She turned her head over whispering beside Cheng Xiaomei’s ear. She was saying it to her and also to herself.

The other squid xenobreed was only around 10 meters away from them...

The bodies of the university students were virtually all completely frozen, Su Lifeng also felt his heart thumping wildly.

This is virtually a sense of fear on a hierarchal level of life.

He closely stared at this squid xenobreed, forcing himself to observe it.

From the size of it, this squid xenobreed was honestly way too big...

As a predator with one of the biggest physiques in the deep sea, the giant squid’s body length is only 20 meters at the most.

But this squid xenobreed has reached an astounding 30 meters or so... This is the result that Su Lifeng came up with from comparing it with the length of the cruiseship.

He immediately thought of that violent shaking that the cruiseship experienced... If it were these two squid xenobreeds that dragged the cruiseship in then that is entirely possible!

But why did signal get lost, and that feeling of friction...

An island that shouldn’t have appeared on the route, a strange sea area, a species that doesn’t exist on Earth... All of this added together instantly made Su Lifeng develop a feeling.

This place, maybe isn't even a sea area on Earth.

In the vision he heard "The door is open", when the cruiseship was squished, maybe it was passing through that "door".

"No matter what, survive..." Su Lifeng said silently in his heart.

At the same time he also thought of that black thread that entered into his body... Since the xenobreed will take over the body of other organisms, why is he okay? Or is it that at the time, the xenobreed in Cheng Peng's body had already been killed by him and he... absorbed it?

Hua!

After ripping apart a couple of tourists, that squid xenobreed suddenly stopped for a moment and then abruptly turned around!

The two eyes like giant wheels on that ugly head all of a sudden looked towards them...

Su Lifeng's mind instantly stopped thinking.

## Chapter 8: Trickery

I just found out that there are a ton of 48 groups. Besides akb48 there's like hkt48, jkt48, nmb48, sdn48 and other 48s. They also have sister groups in China like snh48 and bej48. And I just realized that the letters represent areas/cities. Soon my friends, the 48 idol groups will be coming to all parts of the world. Eventually there's even going to be an NYC48.

---

The immense difference in size and strength made running away and resisting all appear like a joke.

But very quickly Su Lifeng's mind cleared up.

Reality proves that his judgement is not wrong, hiding here is safer compared to those people swimming towards the island.

Right now, it all depends on whether or not his solution works...

Under the circumstance where they are sticking closely to the cruise ship and also using Cheng Peng's body to muddy the waters, maybe this xenobreed squid won't attack them.

After all, with respect to the xenobreed squid, their size is honestly too small. Under the circumstance where they are completely still they simply don't have any sense of presence.

And as long as an opportunity shows up, they can secretly bypass the vision of all of the xenobreeds and board the island.

The closest distance from this place to the island is only 20 meters...

"We have to do it!"

But in the end Su Lifeng was still unable to think of everything... He overestimated the psychological endurance of the other people when facing this kind of crushing threat.

Following a tentacle suddenly sweeping by not far away in front of them, staring at the nearby terrifying suckers, that boy holding the iron sheet suddenly trembled and then released a loud roar, throwing the iron sheet over.

The instant the iron sheet came in contact with the tentacle, everybody's hearts instantly stopped beating...

The boy used all of his energy to kick the water two times and then started swimming to the side.

"What are you doing!"

Water splashed up and one male student opened his eyes horror-stricken, roaring in anger.

The boy holding the iron sheet turned back his head and said shrilly while swimming: "I didn't want to either, I didn't want to! But look at Su Lifeng, when he killed Cheng Peng he didn't even bat an eye! We aren't familiar with him, why did he save us? Moreover why does he know so much! Maybe we are all his bait, he will cast us aside one by one! I'm sorry, I can't die yet... I'm more cowardly than you all, I really don't want to die!"

"...Ah!"

The male student wanted to continue cursing but that tentacle fiercely smashed over. He let out a scream and subconsciously wanted to evade but was grabbed by Su Lifeng.

"I said don't move no matter what happens!| Su Lifeng roared in a low voice.

"Ah..." The male student's nerves were already about to explode, he watched helplessly as that tentacle as thick as a human body filled with suckers rapidly grew bigger in his vision.

Su Lifeng's expression was no better than his... But in his heart he was fully aware that if this plan doesn't work, then they will only die even faster by running away!

How can they compete in nimbleness against this kind of massive creature in the water!

Fwoosh!

The tentacle stopped above Cheng Peng's body.

A look of confusion was clearly exuded in those massive eyes of the xenobreed squid.

It stared at the corpses and the couple of vague figures behind it, seemingly unable to make a clear distinction.

“Success!” Su Lifeng secretly let out a breath of relief.

He gambled that these xenobreeds all possess the ability to think!

But from what he saw before, the current thinking ability of these xenobreeds is also very limited.

Their behaviour appears a bit stiff...

This is why he would think of “tricking”, a lot of successful examples of this can be found in biology.

Protective coloration, camouflage, misdirection...

That male student’s eyes were frozen. At the very instant, he felt that he had already died...

For a moment the xenobreed squid couldn’t make a judgement, but it also isn’t willing to just easily give up like that. Instead it was that iron sheet boy who was too small of a target and was temporarily ignored by it.

Su Lifeng glanced in the direction of that iron sheet boy, suddenly biting his teeth and slowly raising up the steel pole.

Jiang Yushi noticed his movements and immediately had a guess. Her expression instantly became nervous.

“Hu...” Su Lifeng exhaled softly, his body slowly leaning forward.

He felt Jiang Yushi extend her hand and grab hold of him, and that intricate face was covered in tears, looking at him with shock.

But very quickly Jiang Yushi slowly released his arm, only silently shedding tears.

“I won’t die.” Su Lifeng clenched the steel pipe and said in his heart.

The next second he suddenly jumped forward, hugging the tentacle and then brutally stabbing the steel pole in.

Su Lifeng heard a popping sound and then the next moment, the sound of gurgling water travelled over beside his ears along with the horrified cries of

Cheng Xiaomei and co.

The strength of the xenobreed's tentacle is honestly terrifying, in addition there exists powerful suction on the suckers, but right now these are all not a problem for Su Lifeng...

"It's not over yet, there's still one more step." He has never been so calm before. Even if he had already restrained his emotions a lot today to survive, he has still never been so clear-headed like at this moment.

While the tentacle swung around violently, Su Lifeng yanked out the steel pole. Following large amounts of a jelly-like substance flowing out, he was also flung back into the sea.

"Now!"

He fiercely raised up his arm and then mercilessly threw the steel pole at the iron sheet boy: "Give and take, don't thank me!"

The iron sheet boy who was swimming wilding wanting to get far away turned around his head. His face instantly revealed a hint of despair and his face became twisted: "No... No!"

The xenobreed squid's judgement is limited... The iron sheet before made it become aware that these human figures could be alive, and right now its vision also followed the steel pole.

This item was still carrying its blood, if the jelly-like substance could still be considered blood.

Compared to the iron sheet, this item is even more strange to it.

This is probably the first time it has been hurt by this kind of thing...

That giant body of the xenobreed squid's instantly moved. It chased after the steel pole, namely the direction of the iron sheet boy.

Jiang Yushi felt that within those short 1-2 seconds just now, her heartbeat had already completely stopped.

Only when she saw Su Lifeng's figure emerge did she raise up her arm and cover her mouth.

“Go, let’s go!” Su Lifeng said.

Right now, the other xenobreed squid is killing tourists and that iron sheet boy and that steel pole are sufficient for this xenobreed squid to ponder for a while.

“No, no, it shouldn’t be like this!” The iron sheet boy looked at the approaching xenobreed squid. His survival instinct drove him to continue swimming forward, yet following the sound of whistling wind behind him, a flash of scarlet blood flickered before his eyes... That is his own blood.

For the xenobreed squid, this human still didn’t really have any presence. After slapping him to death with its tentacle it dove down chasing after that steel pole...

“There are still a lot of... humans who boarded the island.” The middle-aged woman amongst the xenobreeds spoke of the results of her observation.

The girl beside her nodded her head: “Yeah... Adding the ones before... it should be enough for the wisdombreed...”

After a couple of minutes their speech was clearly a lot smoother.

“But that... special human organism, did not turn, and also did not die, and also did not... discover him...” The xenobreed middle-aged woman said.

“Maybe... he also boarded the island.” The girl said so while staring in the direction of the island. She then revealed a smile a lot more natural than before, “That would be the best.”

## Chapter 9: Recognizing Reality

May the ninth be with you... I got nothing.

---

Splash!

On the other side of the island, the sound of water travelled out from behind a couple of rocks. Afterwards Su Lifeng and co. climbed onto the shore.

After everybody did their best to distance themselves from the sea, they all collapsed to the ground as if they had their strength sapped from them.

“Guah...” One boy’s face twitched a couple of times and he then suddenly crawled to the side and started dry-heaving.

The faces of the others were also pretty much the same as his...

Watching so many people get brutally murdered up-close, that kind of impact is honestly too strong.

Especially when they were virtually face-to-face with the xenobreed squid just now...

“Su Lifeng, are you okay?” After catching her breath, Jiang Yushi immediately grabbed Su Lifeng and asked.

Only now did everybody think of the shocking scene of Su Lifeng taking the initiative and attacking the xenobreed squid... That they can stay alive right now is all thanks to Su Lifeng’s decisiveness and desperate gamble.

But it’s really hard for normal people to do such an alarmingly dangerous thing, right? That really is putting your life on the line!

The eyes of these regular university students looking at Su Lifeng became completely different...

Even if his completely drenched appearance with his hair sticking to his forehead and his pale face honestly looked completely harmless.

Just looking at his looks, Su Lifeng actually doesn’t have any fierce qualities, he is more like that kind of boy who sits quietly and reads.

“Hm? I’m okay...” After just responding, he suddenly felt like his belly had been torn open.

At the side, Cheng Xiaomei followed his gaze looking downwards and immediately covered her mouth exclaiming: “Ah! Classmate Su you... you’re hurt!”

At some unknown time, a giant hole was ripped open in the clothes at Su Lifeng’s abdomen, revealing the blood and flesh that were dug out.

“I was probably hit by the tentacle back then...”

His heart also tightened, yet when he carefully wrinkled his forehead and lifted up his shirt, he discovered a bit stunned that such a deep wound had actually already stopped bleeding.

“Strange...”

Su Lifeng right away thought of that blood spot on his wrist... It also vanished really quickly.

Could it be related to that black thread that wormed into his body?

And then thinking of the tentacle’s power of being able to smash to bits the human body just by a touch, he may also feel pain, but not even his internal organs were damaged... As a life science grad student, it’s not hard for him to make this judgement.

Thinking here, a strange thought suddenly surfaced in his head. He couldn’t help but extend his hand and touch the wound.

The residual blood stuck to his fingers. He lightly rubbed it... It was a bit sticky, very quickly a couple of black lines were rubbed out...

Su Lifeng’s scalp jumped and he almost couldn’t control the expression on his face.

Being viscous is clearly the state of that jelly-like substance, it’s just that the degree of viscosity is a lot less.

But no matter what this is the characteristic of the xenobreeds!

He really didn’t guess wrong, after killing Cheng Peng he absorbed that

xenobreed in Cheng Peng's body.

"Let's do a basic bandaging..." A cold and soft touch travelled over from his stomach, making Su Lifeng return back to reality.

Jiang Yushi was holding onto a pant leg that she just ripped off, attempting to help him bandage the wound.

"I'll do it." Su Lifeng was instantly a bit nervous. He didn't dare to let Jiang Yushi come in contact with his blood and made a quick knot himself.

Seeing Su Lifeng appear to still have energy to move, everybody felt relieved.

Because even though they've temporarily escaped the danger of the xenobreeds, they are still a far cry from "safety"...

Not mentioning that the only cruiseship is occupied by the xenobreeds, just this island looks like there's a big problem with it.

"The rocks here are very strange, they're virtually like fossils. The texture is also very different from the ones we usually see."

"And this grass, why is it all black, and it's as hard as wood..."

After the boys all slightly calmed down, they voluntarily started to survey the island's environment.

If they can only continue being a hinder the whole time, who can guarantee that Su Lifeng really won't abandon them?

"If we are going to find a place to hide and wait for rescue then it's best to not go too deep..." One boy recommended, thinking himself clever.

But this time, without needing Su Lifeng to speak, the people beside him were already looking at him with an expression of pity.

"Wake up." But Su Lifeng did not say anything and only sighed, extending his arm and patting his shoulder.

He took over the chair leg from Jiang Yushi and then crouched on the ground saying: "First of all we need to know exactly what happened. I'll say my guess first... I think our ship was forcefully dragged through a door by those two xenobreed squids, you can say it's a dimensional door or a spatial rift. In other

words, where we are right now could very likely not actually be far away from our regular route, but they are in two different spaces. Can you guys understand what I'm saying? Of course, don't ask me what my guess is based on."

While speaking, he scratched a door on the ground and then drew two different but overlapping sea areas as an illustration.

"After the cruiseship sailed to this overlapping space, the spatial door opened up and then the cruiseship lost signal. Afterwards the xenobreed squids took action... This is all purely my speculation, pay no attention to it. I also want to know what exactly the truth is like, but right now I can only make this kind of conjecture based on these clues."

The other people were a bit stunned, but afterwards Cheng Xiaomei nodded her head and said in a low voice: "I think it's possible, you guys probably haven't ever seen such a calm and strange sea area either. Moreover... Before fainting, it's this kind of mist that I suddenly saw... Even if mist rises up on the sea, there wouldn't be so much that suddenly emerges, right?"

This is the first information that she spoke of. Su Lifeng glanced at her in surprise and then secretly nodded his head. Like this his speculation can basically be established... Them collectively fainting could be the aftereffect of passing through the spatial door...

The other people who saw the mist probably also have a guess, but unless they have the ability of precognition like Su Lifeng, it is very hard to think of so much all at once.

"And then it's the xenobreeds, namely those organisms that controlled the tourists." Su Lifeng continued saying, "These organisms are clearly the natives of this island, or this world. Their way of saying hi to us is taking over our bodies. So no matter what, be careful of all creatures you see, regardless if it's humans or whatnot. Once taken over, it's no different from dying..."

When he spoke up to here, a hint of uneasiness flickered in his eyes.

He absorbed the xenobreed, what kind of situation is that...

"The final point is, I know that what everybody wants the most right now is to go back, but before completely understanding these xenobreeds, we don't have

a chance.” Speaking here, Su Lifeng clutched his stomach and stood up. He looked towards that forest as pitch-black as ink behind him, “So, we’re entering the island.”

Everybody simultaneously looked over and instantly felt that in those eerie branches, there seemed to be many pairs of eyes staring at them...

At the same time, some images surfaced in front of his eyes.

It was still that black figure suddenly pouncing towards him wanting to “absorb” him, but this time the black figure distinctly became a bit more clearer and he could vaguely see that it is a human figure.

At the same time there was also the scene of large numbers of corpses lying on the ground, amongst them were shockingly Jiang Yushi, Cheng Xiaomei and the rest.

The cruiseship stood silently above the sea, seemingly never again having the chance to sail out...

Everybody died.

Su Lifeng suddenly returned to his senses and then clenched the chair leg.

Since it’s just a living creature... Then there’s nothing to be afraid of!

I’ll show you that I can even dissect an alien!

## Chapter 10: From Guest to Host

Cheese Whiz adds personality, personality... I hate Cheese Whiz, but I love cheese!

---

... Towards Jiang Yushi and the others, Su Lifeng still has a lot of things that he didn't say.

One is the spatial door, this door can let a cruise ship come in, will it also close?

The reason those xenobreeds take over the bodies of creatures on Earth is to evolve. In other words, the entire Earth with a rich diversity of life is a giant feast for them!

They will not easily give up on the food in front of them.

The second point is, the existence of those two xenobreed squids along with the matter of the cruiseship being dragged in makes it very hard for people to believe that the opening of the spatial door is a coincidence.

These xenobreeds, they premeditated this.

There's also the third point that is the most dangerous for Su Lifeng and co.... After those wounded were injured, they clearly all lost the ability to move. They couldn't have boarded the island on their own.

Which is to say, the xenobreeds themselves also have movement ability.

As for why they chose the wounded at the beginning...

Thinking of the successive difference of those humans that were absorbed and taken over, Su Lifeng believes that from a biological level, humans belong to the category of "over nutritious" for the xenobreeds.

The situation of the absorption of humans is not ideal for them, but it is slowly improving.

Which is why at the beginning, they only started with those injured people. Consider it a safer test.

"They really are organisms with really high intelligence..."

Su Lifeng extended his hand touching the wound at his abdomen. Only a couple of minutes have passed and his wound actually doesn't hurt anymore.

“Speaking of it, when I attacked Cheng Peng and that squid, they also didn't have any reactions to pain... Regeneration, resistance against attacks, pain relief, are these some of the biological characteristics of the xenobreeds?” Su Lifeng silently stuck on another tag in his heart for the xenobreeds: Very all-rounded developed organisms.

At this time, the boy on guard walking on the left suddenly released a low cry of surprise.

Only before entering into the island did Su Lifeng just learn their names and make arrangements for them to scout cautiously in front and at the back.

The reason Su Lifeng saved them before was because he had some kindness in his nature.

But now that they've boarded the island, it is the time where everyone is needed to play a role.

Even Cheng Xiaomei and Jiang Yushi these two delicate girls are vigilant of all movement in their surroundings. Cheng Xiaomei was even constantly uttering in a low voice: “I'm not scared, I'm not scare, I can do it...”

“Feng Kun, what's wrong?” Su Lifeng hurriedly put down his hand and walked over.

The boy pointed at a corpse in the black grass of which only the upper body remained and the lower body had completely rotted to a blood-red jelly.

Su Lifeng held back his disgust and crouched down using the chair leg to poke that pool of jelly. He then glanced at the face of the corpse.

It is a relatively young woman with heavy makeup. Surely she used to be very glamorous and eye-catching, but now all that remains is death and horror.

“There is a wound at her chest...”

This is the first batch of people to be absorbed. Looks like even if it's the wounded, the success rate still isn't much.

And there is no black thread coming out from her body...

“Is it because she’s been dead for a while? Or is it because she wasn’t killed by me?” Su Lifeng thought in his mind.

Jiang Yushi suddenly said: “Looking at the direction she was walking in, she presumably wanted to follow that group of wounded before to the shore together. Then, if we follow the direction she came from, will we be able to find the nest of the xenobreeds?” Seeing Su Lifeng all of a sudden look at her, Jiang Yushi hurriedly corrected herself a bit uncertainly: “This is just a descriptive term, because the feeling the xenobreeds that you speak of give me is a collective. So I think could they have a nest to inhabit... I’m just randomly guessing...”

“No, you’re very right.” While nodding his head, the scene of when that black figure appeared surfaced in his mind... For him, that is where the greatest danger is. And the location of that black figure, is on the island!”

To eliminate the threat, the best way is to turn from the guest to the host!

“Even though the predicted events are all guaranteed to happen, that does not mean that the result is destined.” Su Lifeng bit his teeth and said, “We’ll follow along this way!”

Hearing that they’re going to find the nest of the xenobreeds, the expressions of Feng Kun and co. all looked a bit pale.

But they also know that there is no other way out right now. So they still restrained their fear and carefully went around the corpse, walking in the direction her back is facing.

... Right now at a place not too far away from Su Lifeng and co.

“Ah... Alive, I’m still alive!” A female university student climbed onto the shore and instantly broke down crying.

She then turned her head looking behind her, Zhang Hai also flopped out from the water.

His face was also ghostly pale, but there was a hint of madness in his eyes: “A miracle of life, they’re a miracle of life...”

“Zhang Hai, it’s all you, if it weren’t for you not listening to Su Lifeng’s

words...” That female university student was already hysterical. She suddenly lunged over, firmly slapping Zhang Hai’s face, “Are you scared silly?!”

Yet, this slap of hers knocked awake Zhang Hai.

Zhang Hai abruptly raised his head, grabbing the female university student’s arm that wanted to slap over again: “Didn’t you see? These are all miracles! What do you know!” He fiercely threw the female university student to the side and then stood up, looking in the island, “All miracles... All miracles...” While speaking he walked into the island.

The female university student had already been frightened by Zhang Hai’s fanatical look. Only until Zhang Hai’s figure disappeared did she mutter: “He’s gone crazy...”

.....

En route Su Lifeng and co. discovered a few more corpses. Unsurprisingly they were all those wounded people that went missing before.

Each time, Su Lifeng would always go up and examine them, but the result was no different from before.

After seeing a number of corpses, the balls of Feng Kun and co. also gradually grew bigger.

After discovering a corpse again, Feng Kun copied Su Lifeng’s movements and crouched down.

This time it is a woman roughly around 30 years old and wearing a swimsuit. Her body emanates a mature charm different from a 20 year old girl.

Feng Kun stared at the woman’s silky neck and thought a bit regrettably, such a beautiful woman, too bad.

He looked at the butter knife in his hand and then stabbed down at her rotted left arm.

Pu!

They call it rotten, but this kind of jelly-like substance really isn’t like mere flesh.

She really is a xenobreed... Feng Kun sighed with emotion.

Yet, right at this moment, this woman suddenly moved a bit.

That beautiful neck of hers suddenly twisted, she opened her mouth and bit towards Feng Kun.

“Ah!”

Feng Kun suddenly released a scream, subconsciously swinging his hand and falling back on his butt.

The woman only had the upper half of her body left, but this did not affect her movement...

She used her remaining left arm to support her body and rapidly crawled towards Feng Kun.

Feng Kun was kicking himself in the butt... He should have been closer to Su Lifeng.

This time he's a goner...

“Bam!”

Feng Kun's legs trembled violently, blankly staring at the chair leg stuck in the back of the woman's head. He then stiffly raised his head looking to the side.

Cheng Xiaomei was standing there with a face of horror. Only after several seconds did she abruptly kneel down and say in a low voice: “I... I killed her... Ah!”

At this time, Su Lifeng had also already rushed over. After just arriving, Cheng Xiaomei flew into his arms while Su Lifeng glanced at the corpse and then yanked out the chair leg.

This time he saw very clearly, at the instant he pulled out the chair leg, a black thread rapidly wormed into Cheng Xiaomei's body...

## Chapter 11: Bait

I am really not in the zone. The grammar for this chapter feels a lot clunkier to me. I'll come back at some time in the future to check it out again. Sorry guys.  
Edit: Scratch that, it's just my usual crappy grammar.

---

"It's okay, it's okay..." Su Lifeng lightly patted Cheng Xiaomei's back. After consoling her he asked very naturally: "Are you hurt?"

While crying, Cheng Xiaomei responded saying: "No, I... sob sob sob..."

"Then is there somewhere that feels different?"

Cheng Xiaomei thought for a moment and then heavily shook her head: "Sob sob..."

Looks like I won't get any answers.

But Su Lifeng perceived some things on her body that were a bit different from before... When she shook her head, it felt like her strength was a lot stronger, her originally pale face also looked a lot more rosy.

Of course, this could also be due to being too emotional...

Additionally, Su Lifeng vaguely noticed that there seemed to be an extra blood line in the whites of Cheng Xiaomei's eyes.

This blood line crossed through the middle of her eyes and looked a bit spooky, but if not closely looked at it is very hard to notice.

Did she originally have it? Or did it suddenly appear?

Su Lifeng temporarily put away these thoughts to the side and then helped up Cheng Xiaomei. Afterwards he looked down at Feng Kun who was endlessly scared: "You'd best learn how to save yourself."

Afterwards he then looked at the other few people: "The fighting strength of these xenobreds right now is actually not strong. As long as you conquer your fears, even Cheng Xiaomei can kill them, right?"

After finishing speaking, he comforted Cheng Xiaomei again and then took the

lead and walked to the front.

He has a feeling that this place isn't too far away from the xenobreed nest.

Feng Kun was still scared out of his wits. That moment just now, he was honestly too close to death.

Right now, what made him afraid was not just these xenobreeds, but also this island.

Exactly what kind of place can give birth to this kind of monster!

The gaze of that pretty woman looking at him just now was like she'd seen something new and interesting...

Feng Kun was very familiar with this kind of look. When he was young and he caught a bee and then happily ripped off its wings along with its stinger and internal organs, he had this exact look.

This is a sense of natural indifference when a higher species faces organisms weaker than it...

Yet when this feeling appears on himself, Feng Kun feels extremely appalled.

This kind of place, can they really walk out alive?

"Here, Feng Kun, get up." A boy called Han Fei walked over and pulled him up.

"Han Fei, Su Lifeng's words, why do I feel so uncomfortable listening to them? Is he saying that not only are we beneath him, we aren't even better than a little girl?" A different person glanced at Su Lifeng's back and lowered his voice, saying a bit frustrated.

"Yeah, we're all classmates, it's too much for him to speak like that. After all, we are all ordinary people, nobody can be like him..." Han Fei nodded his head agreeing. He then thought for a moment and said: "Sigh, forget it, you guys don't have to worry about it, after all we still need to help each other to have a chance to endure..." Yet, while speaking, Han Fei's gaze involuntarily looked towards Cheng Xiaomei and then looked towards that corpse.

"I just don't know how Classmate Su knows so much information that we don't know. It's like he's very familiar with these xenobreeds... Haha, I'm just randomly saying."

Han Fei suddenly threw down this suggestive line and then let go of Feng Kun walking over.

The remaining students all looked at each other, they all couldn't but ponder on the meaning of Han Fei's words in their hearts.

"Bam!"

A xenobreed that looked like it was already dead suddenly lifted up its body. Su Lifeng caught on quickly and stabbed down with the chair leg.

A black thread instantly entered Su Lifeng's body. His eyes slightly lit up and he silently clenched his fist.

There was no change, but a slight itch travelled over from the wound at his stomach.

"My strength did not increase, but my regeneration is constantly increasing..." Su Lifeng thought in his mind.

Right now towards the change in his body, he has already changed from the uneasiness at the beginning to a form of anticipation.

If his concerns are correct... The spatial door will not close again. Then the increase of strength is very important.

Even if he doesn't consider the spatial door, to survive on the island right now and to return back to the human world, he still has to do his best to get stronger.

"The third one..."

Han Fei stood not far away, observing Su Lifeng and saying to himself.

Starting from Cheng Peng, this is already the third xenobreed that Su Lifeng has killed.

After Feng Kun encountered that one that hadn't entirely died yet, the rest of the people all became more cautious and in a short period of time, they discovered a second one still alive.

That time, without any delay, Su Lifeng went over and killed it right away.

Nobody actually noticed this behaviour, they were even secretly glad that they didn't need to do it themselves.

But Han Fei has always felt that there is a problem with Su Lifeng... A big problem.

He tried to interpret his suspicions from all of Su Lifeng's actions, and right now what he has observed is the situation of Su Lifeng attacking and killing xenobreeds.

The second one was okay, but this one is still far away from them, does he have to rush over to kill it?

The others all steered clear of it.

Different from those xenobreeds on the ship, these kinds of xenobreeds are all mutilated...

Han Fei slightly narrowed his eyes and thought.

.....

The island's area is not big. The place that Su Lifeng and the rest boarded the island at the start is on the other side of the island. But following them going deeper into the forest, they gradually came closer to those people who also escaped to the island.

"Miracle..." Zhang Hai muttered while entering the forest. He did not walk together with those people who escaped onto the island. After staring at these people for a while, he suddenly found a place at the side and blankly stood there.

The other people didn't have thoughts of calling him... At this kind of moment, everybody is already unable to protect themselves, who has the heart to care about him.

"What do we do?" A female tourist asked while crying.

A crewmate at the side looked around the surroundings and said seemingly with some confidence: "We are on the island, go to the highest point and think of a way to call for help! Just staying at the shore like this isn't safe either. Who knows if they will swim over? With a look you can tell that those two monsters in the water are also together with them!"

This claim immediately obtained the support of many tourists... Right now as long as they can get further away from those monsters, any plan is okay!"

After the crewmate and co. entered the forest, Zhang Hai suddenly followed over.

He clenched his fist, the corner of his lips twitching neurotically: “There are definitely more of those creatures. If I follow you guys they will definitely appear...”

Very quickly the tourists entered deep into the forest...

They also encountered a lot of corpses, along with... still living ones.

But under the situation where there are a large number of people, nobody noticed that living xenobreed along with that female tourist he had knocked to the ground.

When that female tourist stood up again, her expression had already changed...

“Noise, there.” She suddenly pointed diagonally forward saying.

“There are noises? Should we go check it out?” The tourists stopped for a moment and then started to discuss.

It it were humans, they definitely wouldn't go.

But noises... On this kind of unknown island where all that enters the eyes is corpses and black plants, they also hope to be able to discover a little something else.

“Let's go over and see?” A tourist carefully recommended.

That crewmate pondered for a moment and in the end nodded his head: “Okay, we'll go over and look, but we have to be careful.”

“We're taking a look from a distance, it should be okay.”

“Yeah...”

But nobody noticed that a bite mark had appeared on that female tourist's hand placed beside her body, and that scarlet jelly that poured out from the bite mark...

## Chapter 12: Encounter

Noobs, 1v1 me Final Destination no items!!!

---

“Ah!!!”

When Su Lifeng sensed that they were becoming closer and closer to the “nest”, a series of screams suddenly travelled over from in front.

“Help!”

It’s those tourists! How come they also came here?

Su Lifeng hurriedly turned his head and waved at Jiang Yushi and the rest. He then carefully approached the direction when the voices are coming from.

In the foggy forest, those tourists who had just escaped from death once again descended into despair. Many people were fleeing in all directions virtually subconsciously, yet from time to time, human figures suddenly popped out and then pounced them to the ground.

After Su Lifeng hid behind a big tree, he watched in terror at the situation before him.

Right at this moment, a tourist who was fleeing in despair suddenly rushed in the direction of this tree. But when he was still a few meters away, a human figure suddenly charged out from the side and knocked the tourist to the ground.

“No, no!”

When the tourist had just struggled back up, this xenobreed had already extended its arm and grabbed hold of his calf. It then twisted it seemingly without using much strength.

Kacha.

Following a crisp sound, this tourist’s screams instantly vanished. And Su Lifeng who originally wanted to rush out immediately stopped his footsteps in their tracks... What’s going on? It’s not absorbing him and turning him?

After that xenobreed knocked out the tourist, it held onto that twisted, malformed leg of his and dragged him in the other direction of the forest.

The xenobreeds' combat ability seems to be growing stronger and stronger.

Moreover, that look in their eyes that seems to be the exact same as a human's, but is also devoid of humanity makes people instantly think of the word "monster".

"Follow over and look." Su Lifeng wrinkled his forehead, but he couldn't help but have this thought in his mind.

He had virtually no hesitation and immediately turned around saying to Jiang Yushi and co.: "You guys hide around here, I'm going over to check things out."

"I'll go with you." Jiang Yushi blurt out.

Su Lifeng originally wanted to reject her, but looking at Jiang Yushi's determined gaze, he still nodded his head after thinking for a moment and said: "Okay then, everybody else be careful. Especially when you guys encounter a special situation, I'll come back as fast as I can."

"Classmate Su..." Cheng Xiaomei also wanted to follow over, but after just standing up she felt a burning pain travel over from her hand.

"Ah..." She hurriedly covered her hand. When she lifted her head, she discovered that Su Lifeng and Jiang Yushi had already gone far.

Cheng Xiaomei slowly released her hand and took a look. She discovered that her finger bone seemed to have wiggled on its own for a moment, as if it had life of its own... This made her instantly wide-eyed, what's going on?! But upon second glance, this change also seemed to have disappeared...

"Isn't that Captain Zhang? Why is he here too?" A boy's surprised voice suddenly travelled over.

Cheng Xiaomei hurriedly put down her hand, turning her head and looking over together with Han Fei and the others.

Sure enough, in a bush diagonal of them was crouching a familiar figure.

Only, Zhang Hai's back was facing them the entire time so he did not discover that they were nearby. If that boy didn't have sharp eyes, it would be very hard

for them to discover Zhang Hai.

“Zhang...”

Feng Kun just wanted to shout but he heard Cheng Xiaomei say: “Didn’t you guys hear Classmate Su, when we encounter a special situation we have to be careful...”

“What kind of special situation is this? Isn’t encountering another still living classmate a good thing? He doesn’t look like a xenobreed either.” A different boy immediately wrinkled his forehead and cut her off.

Cheng Xiaomei hurriedly waved her hands and explained saying: “That’s not what I meant, I’m saying it’s better if we remain cautious...”

But she very quickly discovered that she couldn’t continue speaking, because these few people were all moving in Zhang Hai’s direction.

“Zhang Hai?” When they were still a few steps away from him, one boy impatiently called out to him.

They originally thought that all of their classmates were dead, they didn’t think that there were still survivors.

But not waiting for Zhang Hai to turn around, this boy’s face slightly paled.

In the bush in front of Zhang Hai lay a corpse!

Hearing the call, Zhang Hai’s body instantly froze and he then instantly turned his head around.

Only now did the boy see that Zhang Hai was holding a rock in his hand. The rock and his hands were all filled with a thick, blood coloured jelly.

Evidently, the corpse is a xenobreed...

The boy walked past him taking a glance and nearly vomited.

This xenobreed was already about to be smashed to pieces...

“Zhang Hai, you...”

Zhang Hai stared at these classmates and then grinned. He threw away the rock in his hand: “Don’t misunderstand, I’m just... I’m just protecting myself. When this xenobreed was fighting with the other tourists, it was injured and

then came to attack me. I could only smash and smash and smash... Use all of my energy to smash it! Afterwards, it turned into what it is now. Do you guys know? It can completely absorb all of the internal organs in the human body as part of itself. All that's left of the body is actually just a layer of skin. What I've killed can no longer be considered a human, really."

But when he said all of this, Zhang Hai's face did not have much of an expression of fear. Instead it was everybody else who was shocked by his endless and detailed account.

Seeing everybody dumbfounded, he laughed and then suddenly asked: "Forget it, just looking at you guys I know that you guys still cannot understand. If remember correctly, shouldn't you guys be together with Su Lifeng? Where is he right now?"

"We don't kn..."

Cheng Xiaomei answered first. Yet, right at this moment, Han Fei suddenly interrupted her: "Su Lifeng might know the way for us to leave!"

"What?" Zhang Hai was dazed for a moment and then revealed a hint of an ecstatic look.

Cheng Xiaomei on the other hand had her eyes wide-open. She looked in disbelief at Han Fei: "What are you bullshitting about?"

"Me bullshitting? Starting from on the ship, Su Lifeng has always known beforehand some stuff that we don't know. Honestly speaking, I'm even starting to suspect if he's a xenobreed!" Han Fei answered saying.

"How can you say that! If it wasn't for Classmate Su you guys would have already died!" Cheng Xiaomei shook in anger. What made her even more furious is that when she looked towards Feng Kun and the others, these people actually also silently stood beside Han Fei!

"You guys..."

"You say he is a xenobreed?" Zhang Hai suddenly stepped forward and asked staring at Han fei.

Seeing Zhang Hai's fanatical expression, a hint of guilt instantly flashed by in

Han Fei's previously confident eyes: "I, I'm just saying... But he could very likely know the way to leave! I noticed that he seems to be knowledgeable about everything on the island. We'll work together and capture him. As long as he is willing to lead us out then everyone will be happy."

"Both the same, both the same..." Zhang Hai laughed bizarrely and then asked: "Where is he?"

Han Fei pointed in the direction that Su Lifeng and Jiang Yushi left: "There..."

Yet, after just finishing speaking, he saw a human figure flash by beside him. It was Cheng Xiaomei who bolted over there first.

Han Fei's expression instantly changed: "She wants to warn them!"

At this time another figure chased over. Feng Kun sprinted a bit and grabbed towards Cheng Xiaomei's arm: "Classmate Xiaomei, don't be like this. Everyone benefits from us doing this and it won't cause any harm towards Classmate Su..."

His speed is ultimately a lot faster than Cheng Xiaomei's this delicate girl. And yet, right at the instant when he was about to touch Cheng Xiaomei's arm, Cheng Xiaomei suddenly retracted her arm... Accurately speaking, only her hand retracted.

Her wrist was as if there were no joints, turning past her palm at a shocking angle. Her five fingers slid across Feng Kun's arm like blades.

"Screw off!" Cheng Xiaomei cursed in panic and disgust. After doing just this once action, she continued sprinting forward without even turning her head.

Feng Kun stood blankly on the spot. Only after one or two seconds did he watch helplessly as a line of blood split open from the center of his arm and then fall beside his feet with his attached hand.

"Ah!"

## Chapter 13: You're so Right

[Rise up my friends, rise up for the revolution!!!](#)

---

While Feng Kun was swinging around his blood-spraying severed arm, Han Fei and co. still hadn't returned to their senses. They didn't even know what just happened...

Only Zhang Hai narrowed his eyes and then used his blood-soaked hand to push up his glasses with a calm face. He said: "Let's go quickly."

"But..." Everybody was instantly surprised and then one person couldn't help but open his mouth and speak.

A hint of ridicule instantly flashed by in that pair of eyes of Zhang Hai's behind the lenses: "You think he can still be saved? If you guys want to stick around and wait for death then it's up to you guys. Anyhow if we don't leave right now the monsters will all be drawn over by his screaming.

Everybody hurriedly looked around them. Sure enough, there were already human figures not far away suddenly stopping their movements and following the sound looking this way. Even though they can't see them clearly and especially can't see their eyes, but without needing to think they know that they're definitely xenobreeds.

Han Fei glanced at Feng Kun again and then bit his teeth: "Let's go!"

Sorry, you can't ask for everybody to die just for you alone, right...

When they ran towards Feng Kun and then passed by him in his eyes filled with pain and hope, Feng Kun instantly struggled and supported his upper body: "Fuck you Han Fei! You too Zhang Hai! You motherfuckers will all die fucking horrible deaths! I was hurt for you guys, for you guys! Go fuck yourselves!"

Watching their figures vanish in the forest without even turning their heads while the distant xenobreeds grew increasingly closer, that pale white face of Feng Kun's suddenly squeezed out a crazed and eerie smile: "Hehe... Han Fei oh

Han Fei, If you guys didn't abandon me I would definitely tell you guys... Cheng Xiaomei is a monster. If you guys chase over then just wait to come down and accompany me, hahaha..."

"Kacha!"

A black shadow blocked the light above Feng Kun's head. He didn't lift up his head to look. Afterwards, he felt his other arm get pulled up. While tears rolled down his face, he heard the sound of his bones breaking travel over along with an even stronger sense of pain that hit him closely afterwards.

Before losing conscious, he finally had the courage to think about some stuff besides death: "Fuck, don't you see that I don't have the strength to resist in the first place? Why are you still attacking me?"

Following Feng Kun falling to the ground, the xenobreed grabbed his deformed arm and then started dragging him...

At the same time, its other companion was doing the same action and leading Su Lifeng and Jiang Yushi even deeper into the forest.

Su Lifeng observed the change in surrounding while carefully maintaining distance with that xenobreed.

The black fog here really is becoming increasingly thicker. It looks like the fog on the sea very likely all comes from here.

"Lifeng, what exactly do you want to do?" Jiang Yushi asked in a low voice.

"Don't speak." Su Lifeng waved his hand.

Looking at the figure of that xenobreed that silently advanced while dragging the corpse, Su Lifeng still felt a bit nervous in his heart.

Even though these xenobreeds will learn human actions, behaviour and language after replacing the human body, their minds are completely different from humans.

Adding those regenerative and defensive abilities... Who knows how many more abilities they have.

This kind of organism with strength stronger than a human that can wear a human's skin, but be completely different from a human virtually makes people

shiver in fear.

Very quickly, the xenobreed dragged the human and disappeared around a corner. Su Lifeng made a hand gesture to Jiang Yushi to be cautious and then gently got closer.

From the outer appearance, this place seems to be a natural valley, but at the same time it is also a bit different. At least those red jelly substances in the surrounding look very creepy... Maybe Jiang Yushi is right, these xenobreeds really do have a nesting habit.

Yet, just turning the corner, Su Lifeng suddenly felt a chill run up from the bottom of his feet. That momentaneous thought in his mind just now was thrown completely to the back of his head.

This isn't a simple nest.. This is practically a factory!

The valley is packed with this jelly substance, every corner has been covered. This feeling is like after countless pieces of flesh were ground to bits, they were pasted over this entire place. These jelly substances don't have any form, but their constantly wriggling appearance made people's hair stand on end.

The creepiest thing is that when Su Lifeng appeared in the valley, a portion of the jelly substances actually gushed towards him as if they had a mind.

Su Lifeng was taken aback, but his reaction was still very quick. He smashed down with the chair while taking two steps back at the same time.

The jelly substance was scattered apart from the impact, but no black thread appeared.

On the contrary, they very quickly started to move again and slowly pull back together.

"This is probably the 'source' of the xenobreed. If this thing is not cut off, the xenobreed will endlessly... But these things are not taking over human bodies, then why is that xenobreed dragging a human in?"

Su Lifeng took a risk and took another look inside. He discovered that after that xenobreed dragged in the tourist that was knocked unconscious, it did not have any intention of stopping and continued walking deeper in.

“I’ve got to go in.” Su Lifeng instantly made up his mind. The precog vision was like a knife hanging above his head. Every second it is not resolved is a second that he cannot rest.

Su Lifeng really wanted to convince Jiang Yushi to stay behind, but seeing her expression, Su Lifeng knew that it would be a waste of breath.

“It’s very scary inside, but it is also terrifying outside...” Jiang Yushi whispered.

“... You are so right.” Su Lifeng shook his head and told her: “Stick close to me.”

This valley virtually has no paths to speak of. Su Lifeng’s only confidence is that these jelly substances won’t swarm them all at once.

Just now when he was attacked, only some of the jelly substances reacted. This proves that he still has a chance.

“Bam!”

Following him swinging the chair leg and scattering the first pile of jelly that gushed over to him, Su Lifeng immediately pulled Jiang Yushi and walked in.

Advancing while swinging the chair leg, he cannot stop for a second!

As long as his movement slows down by even the slightly bit, they will be surrounded by these jelly substances.

As for the result after being surrounded... Su Lifeng doesn’t want to think about it, Jiang Yushi also doesn’t dare to think about it. She even decided to simply freeze her gaze entirely on Su Lifeng’s back, her hand held tightly onto his.

As long as this figure in front of her doesn’t fall, she will be okay...

This wild act of Su Lifeng’s did not last for too long. When he felt his arm ache and jelly substances seemingly emerging under his feet without pause, the cave entrance finally appeared in front of his eyes, along with... a xenobreed.

This xenobreed is precisely that one that just dragged the tourist in. Upon seeing Su Lifeng, it actually didn’t even pause for a moment, it just growled and then pounced over.

And Su Lifeng was also already mentally prepared. He brought up his strength

and rammed forward. At the same time as bringing Jiang Yushi and charging into the cave entrance, he stabbed the chair leg into the xenobreed's stomach.

Before the xenobreed died, it opened its mouth wide and its tongue actually jumped out...

This scene instantly startled Su Lifeng. After coming ashore he's encountered this new batch of xenobreeds before, but this tongue, isn't this a squid tentacle!

Even though the length hasn't reached the level of a squid and it stopped 2-3 centimeters away from his neck, the degree of terror goes beyond and over!

Absorbed organisms can be fused?

This is the xenobreed?

Su Lifeng was shocked, Jiang Yushi also stared wide-eyed...

At this moment, two biology grad students fell into a completely baffled state.

The instant that those endless jelly substances wildly rushed to the cave entrance, they finally stopped...

"Hu..."

Su Lifeng nearly collapsed. He leaned on the cave wall with one hand and just barely maintained a standing position.

And yet, following the xenobreed falling by his feet, a black thread entered his body and Su Lifeng gradually felt a bit of his strength return.

While being surprised with this change, he touched the ground in contact with his palm a bit quizzically.

This feeling... Why is it like metal?

He hurriedly wiped away the "xenobreed corpse" on top. A faint metallic lustre shone through from beneath the not so transparent congealed jelly.

"This isn't a valley..."

Su Lifeng suddenly reacted over: "This place is a metal building."

But under the state of being covered by the jelly substance, even if Su Lifeng knows that he could be facing alien culture, he can only stare dryly.

Not to mention, he is already very clear on the nature of this alien culture. There is no need to go understand how their nest is built.

After catching his breath for a moment, he lead Jiang Yushi and stepped over the corpse, walking into the cave.

Using the traces the xenobreed left behind when dragging the tourist, they very easily found the correct path in the disorderly passage...

And the further they advanced, the clearer that familiar feeling in Su Lifeng's subconscious became...

This place, is the place that he foresaw himself being killed...
